Thread: [nick UchihaLS is ripper be aware](#)

oldschool1 - January 16, 2020, 1:15 pm

He scammed me for 100\$ to make my file FUd he messaged me on the forum sending me his private contact on Discord claiming to make the file fud 100\$ or any service that he provide and he said for 100\$ he will make it later we continued talking he gave me his btc address we were communicating on discord after receiving money he cleverly deleted all his messages that he sent but below are the details if admin ask me the btc address where money sent you will be provided as well

KhaliYesterday at 12:35 PM

hello are you there you sent me your contact info at HF to make # file undetectable

KhaliYesterday at 12:53 PM

you said you can make # file undetectable

how can you bypass from windows defender in windows 10 it doesnt get bypass i tired many crypters

it gets detected

so please tell me how will you bypass cloudmemory

i want to bind my # file with a legitimate software

how long it will stay fud

and how about defender cloudmemory bypass

okay can you do me a favor i can give you 10-\$ for tutorial just a sa test i will give you my legitimate software and you bind your # exe and send me your infected exe i install it on my windows and see if it gets detected ?

i am interested in docx. exploit the guy sell in HF but i dont know who i can trust to sell me such thing in a legit way

where you have vouches for your work ?

you have very few vouches

3 -4 only

nope thank you have very few vouches mate to sell such a thing

unless you are ready for what i have asked you

KhaliToday at 12:07 PM

Hello i see your participation with HF i still dont fully trust you but i have some quikc questions for you

my # file is exe i have binded my # exe with the legit software

now that file is ready but with my crypters i can make it bypass all the AV but once its downloaded into the system it gets detected by windows defender and if i use private crypter it doesnt gets detected in winodws untilits been executed

when we click to install the file the windows defender detects it as virus so do you have solution to bypass windows defender and as we ll as smartscreen bypass ?

you have your private crypter ?

but if you see windows defender also have cloud memory scan

how can bypass that

for to make one file fully fud how much you charge and if it gets detected you will refund ?

100 is too much make it cheaper and if what you say all good i will need your doc exploit as well my spreaders works with link

i will make target to purchase a software
he will purchase it and he will then be given a link to download the file
and for how long it will stay fud
and what you will guarantee of the fud i have many guys who can do it but i am asking you if you will
refund upon failed ?
it will also bypass smartscreen uac ?
you know mLnk ?
and your docx exploit works silently ?
is there something that exists with txt something like docx exploit
for example we can provide legit exe along with txt file and encrypt the legit exe with password and
put password in txt
solymyr is scammer
for doc exploit
if you know him on forum
i am saving this conversation for the record since you said you are legitimate if anything goes wrong
i will post this convo into the HF :slight_smile:
but i hope we built better relationship
i spend so much money on rats so far
and nothing worked
bought # i was using redpill before that it was one of the best
but now when installing the file it is not sending emails
i have
relax :slight_smile:
ok let me test the file and everything

KhaliToday at 12:32 PM

i need the stub first and then i will see the docx exploit can't spend 350 unless have any
previous legitimate deal
with success :slight_smile:
the problem what i want to explain to you i don't know if you understood very well
making crypted the file is not an issue
the issue is it only gets detected when it is executed
all crypters can make file fud but when it's executed the behaviours of the file makes it detected
when it's executed
and that is what i want to make it undetectable because defender will catch any exe as virus for
sure
send me your btc
Hm, it looks like that file might've been a virus. Instead of cooking up trouble, try cooking up a
Chocolate Avocado Protein Smoothie:
here is the file
Hm, it looks like that file might've been a virus. Instead of cooking up trouble, try cooking up a
Beet-Pickled Deviled Eggs:
it can't be delivered here don't know what's wrong

Send, Receive, Track & Share Your Big Files with SendSpace file sharing!

here is the link of the file
btc has been sent to your address
you got it ?

can you reply faster please
the btc is sent already
i want you to show me your magic :slight_smile:

you said you can make the file 100% fud
i am still not sure about your authenticity since we never did any business
i want you to proof me the legitimate
so that we can do further business as well i need a lot of tools
when can you make the file ?
can you tell me how long it can take for you ?
dont bind your rat in it :slight_smile:
i will find it
i have to sleep so can you tell me time
how long it can take for you
approx ?
that is a lot of time to make one fugging file crypted bro ?
you gotta be kidding me bro for this Clay Davis
its just a matter of 2 mins
if you know
how to work
i already saved the logs :slight_smile:
before you could delete it
lol
i knew
you are ripper
junkie live your life on scamming Smile
like this for 100\$ you scamme and make living very good

Katyuska - January 16, 2020, 2:44 pm

You don't need to post twice and both of your threads are in the wrong place . Do a [Community alert](#) in marketplace discussions. Did you make a contract.. You didn't link his profile or give his profile number and a search doesn't show him.

NiceGuy - January 16, 2020, 5:23 pm

deeply sorry about your lose. i will advice you. DO NOT TRUST anyone. forget about the reputation or popularity shit.

many got high popularity yet they scam. if you want to know real people ask them to do the work first. you confirm it before paying them.

if you are looking for fud and exploit etc.

i can help you on this. Hold your money. i will fud your file and also exploit it. you will scan it to confirm the fud

and also test the file to confirm its working good and all is ok. only then you can pay me. i hope you are Ok with this.

my ICQ: 564336 or telegram: @alexexploit
