Thread: [Anyone interested in a Phone call spammer bot with spoofing module?](#)

ProfitableFlip - January 16, 2020, 8:43 pm

So I'm curious If I should create this...

It will be a bot that will spam call a victim's phone number for "X" amount of times you enter.

It will SPOOF and call with "RANDOM" numbers at all times, OR call with a single specific phone number OR call from a list of "PHONES" you provide via a .txt file, phone by phone, each line being a phone number.

Let me know if y'all would be interested in such program to start working on it.

Also help me appraise it aswell, unsure how much I should charge for this.

If anyone got any ideas of something useful I could create I will be having some spare time to work on things so let me know!

Whilst things like this have been around for a very long time, they are still a interesting project to work on, and potentially gain a little bit of profit, which might just motivate you to create something even better eventually. If you ask me personally I am sure you would get a few sales on here. Either way, I say give it a shot, worst case scenario you gained more knowledge with more practice. ?

Grey Knight365 - January 16, 2020, 11:00 pm

This is a service that has been around a long time and is pretty cheap.

Please link me a thread of someone offering something like this, I tried searching but couldn't find any.

I do recall tho seeing a thread just can't find any now.

Does this script use twilio? If so, you can find these projects everywhere on github commits that use the twilio API.

If not I'd like to see more information, and some proof of concept.

Twilio is cracking down on abuse.

wiz - January 19, 2020, 10:42 am

Just keep in mind alot of telecom companys are working on cracking down a solution to stop this:
