Thread: [LF real coder for esea hack,faceit would be a good extra](#)

DaRapist - January 20, 2020, 8:52 am

Hello there,

First of all, I want to state that I am currently not playing on a team. I used to be ranked top 30 EU consistently on faceit. Fpl-c.

I am not providing anything to just anybody who PM's me.
Don't waste my time, I will never waste yours.

Money is not an issue, bank transfer can be done, NDA signing, I'm all for it.

Just don't come at me with bs,I've been around for a while and I am no easy pray for scammers.

I know the risks,and to me the reward is worth the risk. I don't need preaching,I don't need chatting.
Just plain and simple offers or guidance in the good direction.

Thanks for your time

You should probably put budget/ esea exp. Seems like everyone makes the same thread " yea money no issue im bitcoin billionaire and i am semi pro" but when asked for a few thousand they are flabbergasted at the price but if you could back it up im sure you wont have an issue finding a trusted coder to do this task. but hf is dead and a meme since 2016 same 10 ppl posting in threads in this section so gl finding someone. You could also try highminded but if your not reputable on there you will just get stoned to death.

I could care less about being virtually stoned to death. My former coder charged me 3.5K for my ESEA hack. I already stated I was a top30 player on faceit,I can back that up in several ways. I know very well cheating at this level comes with a cost.

Pilr - January 20, 2020, 1:38 pm

everyone and their dad is top30 player when looking for league cheats apparently. look at epvp/highminded. PM Menalix. I head he would do something with your mobo for a few thousand (:

Kamay - January 20, 2020, 1:57 pm

Contact Menalix, 3000 euro (lifetime) but must ship your motherboard to Denmark (so probably going to be without one for awhile, I'd guess a few weeks depending on where you live or sumthing)

Menalix is very trusted in the community, though and the only person you'll find offering a cheat that

isn't detected or scam. :)

PingersAndMash - January 20, 2020, 3:01 pm

Ur gonna get scammed cheat will work for 2 weeks then banned don't cheat

equitylol - January 21, 2020, 1:32 am

Contact reactionN on high-minded, contact Engineer Man on YouTube or contact any of the dozen developers on Twitter.

Or contact supex0, he has never gotten a customer banned and he will accept anyone now. If he gets angry it's because he's on a harsh diet and a constant caloric deficit.

Tell him I sent you: profile&uid=787058

besides of claiming it, I can actually back that up. I never claimed to be top30 without cheats. I obviously cheated my way up.

But that's a whole different ball game. I got banned on faceit in 2017 and stepped away from the game for a while.

My former dev is not providing anymore.

You should get in contact with Menalix, he might be able to help you in that case.

Never said you was not top 30. But as a few people have said now, ask Menalix maybe he will help you. Just be careful not to be scammed by people.

There are a lot of people on HF who have working ESEA cheats but they are detected every few weeks so its a coinflip as to if you get banned. fstr etc xd

What? Menalix has always had problems getting VAC detected along with other anti cheats. This is public information, and a few times he has admitted this.

Hexui hasn't been detected in 3 years, maybe had VAC detections early on in the cheat, but he's grown as a developer and has been making CS cheats since 2009.

YRN_ - January 22, 2020, 1:35 pm

yea i see alot of ppl saying go to menalix but i messaged him and no response maybe have to be from eu or maybe have to have some sort of exp on esea/faceit but if anyone actually did buy it or made contact with him about it would love to hear it. sounds like a great deal from the homie

netpulse - January 22, 2020, 9:37 pm

supex0 never made anyone banned indeed, he just gave them a free fastpass to VAC kappa

Well I'm pretty much just a re-seller but also the one doing the shellcode for the cheat, the actual bypass is by someone else who I can't get in touch with for now, sadly.

Therefor I cannot provide such cheats, before I hear from my contact again, as this cheat is a hardware implementation and way out of my skillset for that reason as I'm just a software-dev.
