Thread: [Best animated signature on HF](#)

James Burnham - January 21, 2020, 5:18 am

Which is the best, smoothest, most impressive animated signature on HF?

flavoral - January 21, 2020, 5:20 am

For a min I thought HF broke:

OT: best one imo if [Herbert](#) can reduce the size bit more.

I was about to create the absolute best one but [Eagle 95](#) shot me down.

V?rt - January 21, 2020, 5:21 am

Gonna post so I can keep up with this thread. Gotta love some good gfx

wiz - January 21, 2020, 6:41 am

The max limit for sig is 500kb

So you can't really make something smooth lol

That signature is too large of file size.

The best in my opinion would be the support the Hf news. I love some of those designs!

Your sig looks fun, but it would be much better if it was smoother. Looks like it has 2-3 fps.

Prototype - January 21, 2020, 7:17 am

They're all pretty low quality due to the upload limit but its not hard to make a pretty above average one.

Basically the original one is around 4 mbs

eXceptional - January 21, 2020, 7:33 am

The best signature is mine xD

Make me a better one for free and I'll rate that to be the best.

[flavoral](#) did you even check Herberts thread? ?

(Jan 20, 2020 06:40 PM)Herbert Wrote: [\[CITE\]](#) Welp..

645KB is the best I could get it.. without butchering the quality cutting out the indicator only saves 1KB.

He isn't able to reduce it anymore. So technically it's just a design, not any potential to become a signature.

I hope this makes it more clear for you. The best signature in my opinion, is the HF news, since Herbert can't make his design to a signature unfortunately ?

I swear you're missing some brain cells...

I FUCKING SAID "IF HE CAN REDUCE IT MORE"

And I'm telling you that Herbert himself said that he couldn't do it.

So that's the same as telling members; I love my own design, IF I COULD DESIGN BETTER, that doesn't make sense, does it?

Also, no need to flame me. I'm trying to make clear it doesn't make sense because Herbert can not reduce the file size anymore.

He said he can't do it with the current full design, that doesn't mean he can't change some elements of the design to reduce the file size.

Also, your example is literally invalid as that's not what i said, go reRead my posts. lol

I'm going to make one so you guys can laugh att me.

Diamond - January 21, 2020, 8:39 pm

@ [James Burnham](#) , your signature is quite astounding, to be honest : D

"if I could fly"

"if I could see through walls"

"if I could pause time"

"if I could reduce the size"...i could use it as a signature

Mr. Robot - January 22, 2020, 3:42 am

The one I made recently.

True. Who designed it for you?

I win, didn't make it myself and I have no idea who did, but I win.

The user Harlem made it for me years ago back in 2013, been wearing the avatar and sig combo ever since. We got inspiration for the design from when the old official group Complexity we were in together switched over to its modern theme userbar. I have a few different variations of it as well.

This is my sig (because my sig spot is rented out right now):
