Thread: [Unable to tag this member - A bug or a mistake I made?](#)

Lorem Ipsum - January 21, 2020, 9:54 am

I tried to tag the following member; <https://hackforums.net/member.php?action=profile&uid=1359715>
The username of the member is "Greg" but when I tried to tag him, after our successful exchange, I tagged another "greg" without capital G. I edited it to a capital G without success.

I will try it here, once again:

[greg](#) < Should be this Vendor member > link;
<https://hackforums.net/member.php?action=profile&uid=1359715>

I tried it in this thread:

<https://hackforums.net/showthread.php?tid=6040640&pid=59349355#pid59349355> without success.

Could someone try to tag the member; "Greg" (green-vendor member) and tell me if they successfully can do that or if they see the 'white' default member greg without a capital "G". ?

Natas - January 21, 2020, 9:56 am

Code [Greg????????????????????](#)

Lorem Ipsum - January 21, 2020, 9:59 am

How did you do it? All I see is this:

image [\(Click to View\)](#)

As you can see in the thread, I tagged the wrong one again.

Natas - January 21, 2020, 9:59 am

Code [mention=uidhere]

Lorem Ipsum - January 21, 2020, 10:00 am

@Greg????????????????????@ As a test.

Thank you, I understand now how to tag someone who isn't working with the @ tag @. Thank you Natas!

Closed!

If username has a special character (in this case, his G) I'm positive it cannot be tagged with @@. In that case use [mention=uid] as mentioned previously. ?

Omniscient - January 21, 2020, 12:42 pm

I'll look into this because special chars should work.
