I know, I always like to withdraw a chunk then go YOLO. I only play once a day and aim for 30-50K.

because his target is literally 1.01 so it'll hit 99% of the time, and then he just increases the bet to cover his losses when he loses

I used the same strat on stake dice, 1.2x cashout, 1900% increase on loss, went up about \$600

@OP,

You've done the same method as I did in the past. Just betting 1,01 and it's almost 99% sure to win. Right?

Hm, but with how \$ you start?

$100 \times 1,01 = \$101$ . Meaning you can do this a long while without having much risk. Decreasing the start amount decreases the profit as well.

Sounds good! Might try this script myself. Not got much to lose from the old script I used on bustabit lol

Nah man I think it looks a lot better than the yellow.

Maybe a new group color would look better though?
