Avg monthly profits are between 60%-80% with my signals, can be more or less depending on the month, this week's been crazy with amazing results though XD

"Max profit per deal" \$2760 damn my man. Congratulations! You're one of the best day-traders I know.

Do you have some tips for us non professionals?

Haha thanks bro :D ! And I don't do coaching and stuff but my advice for every trader is to develop strategies on demo balance and then test the profitable ones on real balance and see which one is consistent/profitable for long-term. And be prepared for losses, it happens to the best of us from time to time, no1 can win 100% of the time, but as long as you can find a trading strategy/money management that suits you and is profitable for long-term then you'll make \$ from trading.

Not gonna lie,took me long enough and lost a lot before being profitable, but that's the advantage for those joining my group and following my signals, they don't need to go through all that and just make \$:))
