Thread: [Launcher needed | I pay with btc](#)

Zamper - January 24, 2020, 9:05 pm

I need a Launcher,

Similar to this:

<https://hackforums.net/showthread.php?tid=6043797>

I pay with btc, post below your skype/telegram/discord

CottleSilver - January 25, 2020, 7:50 am

discord: ## . I can do it pretty fast, just let me know

gigajew - January 25, 2020, 8:26 am

How about something like this? Didn't have much to go on so just googled Kicks game. That's why it's important to provide as much details and pictures in your post as possible.

I like it, I'm just wondering if that would be compatible on all windows versions

my skype is : live:nevare.btc

Yes it definitely would. The finished system would have:

Launcher application (with news feature)

Single-page server sided news system (PHP,MySQL) with JSON, XML, or HTML API endpoint

And would run you about \$50 BTC, with extended support for bug fixes and minor changes (not including complete rehaul)

My budget is \$25 , honestly is an small task (an app with buttons) and you could lower it.

I added you on discord if you change your mind.

My thing is, you can make it simple or you can add login system where you control news etc. I do free things a lot but I also value my time especially when it is scarce.

I received more than 30 PMS, One guy asked me for \$200 and was even UB3R. I myself know a price-range. If I like your presentation I will simply buy it from you.

Also you need to know I'm not here for the money,I'm here because this is great community.

Wow man, you even downloaded the game :D

Can you give me some contact info to make little changes? I will take it if you don't mind :D

I have nothing against your do not get me wrong.I appreciate my time too but to a developer like you this is ridiculous and it probably took you a few minutes to do it because you can see that this guy needs this and that people want to use it on extremely simple things.

It took me quite a while to do just the design part including figuring out what it needs to look like functionality wise and where to place everything, and then figuring out and testing what actually looks good, so yeah everything takes time and practice. I could throw something together in 5 minutes but it'd look a whole lot worse than that.

But besides this mockup or "sketch", if anyone was willing to pay, and wanted something changed or don't like it, I'd re-do it. That's the difference in a paid product and something free.

Zamper - January 25, 2020, 5:18 pm

@ITcorp helped me a lot with this,

#solved
