Thread: [\[Gambling\] SCRIPT to make you money!](#)

SilverAmerican - January 24, 2020, 10:18 pm

Gambling can be profitable.

I received this script from a buddy of mine who did good with it! It looked interesting and more advanced so I tried it out as well!

The script is absolutely amazing and is quite safe as well. It is recommended to have 7-8k bits and edit the script so the base bet is 5% to 10% of your total balance.

Please remember to use this at your own risk as well, it is gambling after all and there is still luck involved.

I recommend using the Opera GX browser to make it faster and more efficient and to have a decent computer and internet connection as well.

PRICING:

FREE script for upgraded members however the first 30 minutes of profits are mine

\$25 for newer members, non-upgraded members, or people who want to pay up front

[contract=uid]Start Contract[/contract]

DISCLAIMER: Again, please remember that gambling always carries a risk and there is no guarantee. It is possible to get very unlucky in any situation.

Recommendations:

- * Opera GX browser Atleast 7,500 Bits balance

- Decent internet

- * Decent computer or laptop

Here is proof of steady income working for a lower amount of betting as well

Tested it with smaller amounts as well and it works, not much profit in it with smaller amounts but it works.

If you run it with recommended bits you could most likely make 50-80 dollars.

<https://hackforums.net/showthread.php?tid=6032897> It is slightly different from the one from his closed thread. Talked to him about it just to make sure there would be no issues selling this one.

This user received my full permission to edit, improve and sell this script.

I would have done it myself if i had the time for it but i don't anymore due to Satoshi Battles.
