Thread: [NanoCore plugins not loading](#)

RealSkr0 - January 25, 2020, 12:50 pm

I placed all the plugins inside the Plugins folder in the NanoCore root directory.

Basically here: NanoCore/Plugins

The point is the ones i added dont show up in the actual client itself. I've already restarted NanoCore multiple times, still nothing.

Oh that a common problem when placing the plugins in the directory make sure that you remove NanoCore from your computer and redownload from the official site and make sure you save the config files from the Old NanoCore. It has to do with corruption of the executable. Which HASH DO YOU HAVE IN MD5 OR SHA1-256.

Kayfox - January 26, 2020, 6:22 am

don't use nanocore! magically your problem is sovled

Xelux - January 28, 2020, 2:26 am

Nanocore is outdated and the owner arrested

Don't use

MaKuServices - January 28, 2020, 3:19 am

Are there any recent options available in regards to RAT's ?

Used a lot of them before (have been away for awhile) and it seems that most of my RAT providers have been arrested or aren't offering any products anymore
