Thread: [\[BIG OPPORTUNITY\]AI Predictions Bot - NHL & NBA & MLB - Invest or purchase](#)

Nob - January 26, 2020, 6:54 pm

Hello,

This thread technically refers to this other thread :

<https://hackforums.net/showthread.php?tid=6014438>

Long story short : This summer I've used data analysis techniques to exploit analytics of particular leagues. Using this, I have been able to develop a software that can select a number of games, make a prediction on them, and usually the target is hit, and it generally revolves around 80% winrate.

I had troubles selling it as a subscription because it cannot predict all the games, everyday, but only a few games per week. I would say it probably covers 10% of all games. Regular gamblers need regularity. That's why I added more sports, but I am limited by the amount of money I can put in this, which is close to none at the moment. The APIs to get the data can be expensive. But if I can add tennis or european soccer, then that's just a shitload of games that would be predicted everyday. That's why I want to take a whole new approach, and just see if it works or falters.

I am either looking for someone who is looking to invest in this project (50\$ to start with), and who would be somewhat not crappy in marketing, or someone who would be interested in purchasing the entire project altogether, even if that's the least interesting option to me as I want to keep developing on it as I'm still learning new things in my cursus that could be applied to it, like continuous optimization.

If you are interested in any of those proposals, throw me a PM and we'll discuss about it. There's a serious potential and serious money to be made if someone can help with the funding for the time being.

Thanks !

Regards

If anyone is wondering about my credentials, I am in a MSc ENG & CS - AI cursus.

So if we invest, is that going to be gambled? Do we take the risk here?

No, perhaps I have not worded my thread correctly. I am not a gambler. I am a data scientist. If you invest in this, it would be used to increase the number of sports that my algorithm can make predictions on, by allowing me to subscribe to more data feeds. Once we have enough sports, and around 10-15 pronostics a day, then we can go to market and just shatter the world of sports betting by letting people subscribe to the service to access our pronostics.

I just purchased a 10% stake in the company. Will keep everyone updated!

Wait for real? Why do so many users on this forum do that, not much of a good community. I was asked to invest last November but was hesitant to do so.

I believe MLG did the same to me around the time he was releasing so called exploit kit that he got arrested for and took my money with him

DEAL WITH CAUTION DEAL WITH CAUTION DEAL WITH CAUTION DEAL WITH CAUTION
DEAL WITH CAUTION DEAL WITH CAUTION

Seller blocked me after I sent him the money for this payment, he is also very fishy and probably all his method doesn't work.

I will update and check if I get a refund or he exit scams dont deal with him for now, scam report is being opened.

OTHERS HAVE REPORTED HE MIGHT BE EXIT SCAMMING TOO, PREVENT ANY DEALS
WITH HIM FOR NOW UNTIL HE GETS BANNED OR REFUNDS THIS PAYMENT.

He already ran away with someone's money and that guy has mentioned it on the thread itself.
