**Mr. Robot** - January 26, 2020, 10:18 pm

Thought some of you guys wanting to get a career in cyber security could find these as a good read.

They have some pretty interesting information/techniques listed all over the place including data recovery, hacking and more.

Code

<https://imgtfy.com/?q=inurl%3A%22dhs.gov%2Fsites%2Fdefault%2Ffiles%2Fpublications%2F%22>

You can also search by adding keywords on google to the end such as:

Code inurl:"dhs.gov/sites/default/files/publications/" doxxing

Example

<https://www.dhs.gov/sites/default/files/publications/How%20to%20Prevent%20Online%20Harrassment%20From%20Doxxing.pdf>

Here's one of my favorites.

Cyber Security Division  
Technology Guide 2018

Always.

Anywho check this one out.

Not that we think anyone on here will be an active shooter lmao but practices are interesting.

**veiled** - January 26, 2020, 10:56 pm

Imao this must be some sort of joke, the government probably has one of the worst cybersecurity infrastructures out there

**Silent Uprising** - January 26, 2020, 11:59 pm

Are you joking? The USA might not have the best cyber security infrastructures but it is one of the best in the world. I spoke with an FBI agent actually like a year ish ago and he said if there is any cyber criminal they are trying to find...with enough funding they can do almost anything. I'm sure the NSA has some crazy cyber security infrastructure also.

**sweatpants** - January 27, 2020, 12:44 am

I'm amazed at the kind of stuff you post and are able to find out. Definitely worth a read... your work does not go un-noticed Mr. Robot.

**Xzedin** - January 27, 2020, 9:04 am

Some pretty useful stuff in there

**Dotexe** - January 27, 2020, 9:05 am

That'd be interesting read, thank you for sharing Robot.

**V?rt** - January 27, 2020, 9:20 am

Hey that's a pretty cool share! I'm gonna go ahead and read deeper into it

**veiled** - January 27, 2020, 9:44 am

the nsa is a joke

the only few contributions the nsa has benefited infosec is when they got compromised by their own contractor and leaked eternal exploits and maybe ghidra

"with enough funding they can do almost anything"

yeah brother, no shit, they can hire contractors who don't work internally and can dedicate a team of operatives to track down 1 person. that's not really talent, skill, intelligence, it's just spending taxpayer's dollars Imao

lol fbi

**Charger** - January 27, 2020, 9:56 am

Out of all of the 3 letters, DHS is probably the easiest to get into as far as requirements. DHS ranges from TSA bag checkers and FEMA, to the Coast Guard, all the way to the Secret Service.

**Boil** - January 27, 2020, 10:15 am

Thanks for sharing this! Currently taking a java programming class to start early on some CS classes through a local college

**Omniscient** - January 27, 2020, 11:29 am

Great post. Quick Love granted.

**grady** - January 27, 2020, 11:47 am

the US Gov't has way too large of an infrastructure and not near enough money to protect it all from PTAs consistently

also lol @ "infosec" => teenagers on twitter

**Mr. Robot** - January 27, 2020, 4:26 pm

To be fair though, I like your signature - I hope he actually does it. Not too hard.

**Nate** - January 31, 2020, 1:14 am

I've read this in school actually, when I was studying for government jobs. Very interesting.

**Boldy** - February 3, 2020, 2:23 pm

you are the best for real god

**Psychedelic.** - February 3, 2020, 3:07 pm

OH WOW who could of guessed a guy who works at FBI offices bragged about the FBI...

jesus christ son

(Feb 3, 2020 04:27 PM)Brill Wrote: [\[CITE\]](#) did you know pigs fly  
I'm hella sleepy and I don't understand what you mean.

I was just tryna say the NSA is pretty top of the line. What does do pigs fly supposed to mean in this context? Legit question...

Why are you acting like I said something dumb? I was responding to this guy:  
Quote:Lmao this must be some sort of joke, the government probably has one of the worst cybersecurity infrastructures out there

He was saying the infrastructure is a joke for governments. Like as oppose to his house

cybersecurity infrastructure? Idk just seems like he said that without anything to back it. Even if that guy works for the FBI and is bragging about his job, is it still not fair to assume it has good cybersecurity? I mean you don't see the FBI getting hacked everyday by the commonman with their skid tools?
