Hello, I would like to show you method for high probability that I found today in other forum.

The method is based on clicking ads shown by the bot in Telegram App. For one click we get the equivalent of \$1 (0.0001142 BTC).

Withdraw is available from 0.0025 BTC, but what's interesting is that in the guide you will see how to use a script that will show you how to make it completely automatically.

It means that you can have the script working on your computer and you can go to sleep. By that time you can earn even up to \$800.

Link to guide below (no need to download anything):
