Thread: [EASY \\$250+ A WEEK OFFLINE METHOD - MAKE BANK WITH NO INVESTMENT!!!](#)

MikeDin£ro - January 27, 2020, 8:42 am

So i thought i would drop a simple method to make a little beer money for newbies or those in need of a little side hustle...

NOTE: this method is mostly an offline method and will involve you leaving your house.

Everyday people are moving house, leaving the country, or simply just giving sh*t away, now by sh*t i dont literally mean sh*t some of the stuff is really nice or good quality(things like furniture, electricals, etc), good enough to be resold anyway...wink wink :b

at the same time theres people that are in need of those very same things or are simply on the lookout for a deal, so we take advantage of this and get items from those that dont need them anymore for FREE and then sell them for the low to those that do need them.

ok lets go over the steps...

- 1: find 2 popular classified websites in your country/area(in the UK we have gumtree and shpock).
- 2: on one of the websites/apps look in the freebie section for people giving away furniture, electronics, etc.
- 3: once you find a item that looks decent list it on the other website/app for a few bucks depending on what it is(use common sense).
- 4: once someone contacts you thats interested in buying, just tell them its collection only or offer delivery for an extra fee(most people wont mind picking it up, so all you need to do is pick it up from the person giving it away and deliver it to the person who wants to buy it).
- 5: rinse&repeat with multiple items to make bank on a regs.

Dont underestimate this method, i knew one guy that was doing this for a while and tbh at first i thought he wasnt getting anywhere but he was actually making racks from doing this with second-hand computers, if you have a van and storage space like a garage attached to your house, etc. you could scale this up by storing those items people giveaway and selling them when you get buyers that will eliminate missed opportunities and juggling pick-up&delivery...think outside the box and this could be a serious little side hustle for you ?

Yeah, in principle its pretty simple but sometimes the simplest ideas are the best. All it requires is for someone with active mindset to making money and a large garage to go for it.

Cheers OP for sharing - I like this method because if worst comes to worst you haven't made a loss you've simply filled your garage with crap.

this is actually genius, Ive

never thought about this, probably going to try this out
