Boil - January 27, 2020, 10:20 am

To start us off I have a cheap phone which is a Samsung A10e

Been saving up for a Samsung Galaxy 10e or the 10+ since their value dropped a lot but it's still a great phone.

Also what is your favorite feature of your phone?

Mine is the teardrop notch (lol) Gives me a great view for watching YouTube.

QTipx - January 27, 2020, 10:25 am

I got a Huawei P30 pro and a iphone xs (only use iphone for app testings)

I really dont use my phone(s) alot in general - They're only used for phone calls and app testing.

keztheguru - January 27, 2020, 10:26 am

Iphone 6s, I don't need anything fancy.

Burnzy - January 27, 2020, 10:27 am

samsung s8! great phone but i recently got wasted and i fell like a bitch landing my entire body weight on the phone... funny because i never dropped it since i have it and now it has a cracked screen, i wanna get note 10 but its expensive af so i might get s10

bobcat - January 27, 2020, 10:31 am

I use an old S5 with LineageOS as main device and also carry around a stock S10 as a toy.

Doing this for privacy reasons. My S5 is really secure and privacy friendly, it doesn't even have gapps. But I still wanna play games like Clash of Clans so that's what the S10 is for.

Wow I'm impressed. My privacy is on a VPN but I have gapps and my clash of clans.

How satisfied are you with Lingeage? I thought about flashing it on my phone earlier, as I really would like to get rid of tha bad G.

It's exactly how I want a phone OS to be. Secure, open source, private, no bloatware and customizable.

Been using it for years (started back when it was called Cyanogenmod on an S3) and I never had a single issue with it.

It's a bit of a hassle if you don't know what you're doing though, do your research.

KrazyHigh - January 27, 2020, 10:56 am

I got the iPhone 8+ gold.

I can't wait to switch to Note 10

Citoa - January 27, 2020, 11:36 am

I have the Huawei P20 Pro. This is my second huawei phone and I can say that I am pretty satisfied with it. It seems like the company listens to their customers and make a lot of little features and functionalities that make up a great experience and give the user more control and options on how they use their phone.

Takehito Morokuzu - January 27, 2020, 12:47 pm

Sony Xperia XZ2. Might get a new phone when I can afford it. Probably Xiaomi Mi Mi 4 5G or the Mix 5 depending on when

Xen - January 27, 2020, 12:57 pm

I have a Samsung Galaxy S10+ Ceramic White and I love it. It's an awesome phone, I'm looking forward to see what the S20 Ultra is going to be like.

Recently bought a iPhone 11 Pro Max which my girlfriend is currently using which seems to be a pretty decent phone also.

Blackberry Z30 , I know it's super old and the OS is outdated but despite its 8 MP Camera it takes some great shots , also the Stereo speakers are great , and the OLED screen is just good

Also have Other relatively Old devices

Iphone 4s

Nokia Lumia 635

a nokia feature phone that lasts over 7 Days in a single charge , I carry it with me always as I can't trust any smartphone really .

I am getting a Google pixel 3a , I found a good deal and will pick it for 140 USD .

Phones these days are way too fragile; No matter what fancy phone I get for myself, Once it slips its done with. Recently I broke my One Plus 7 Pro.

That's why I now have bought a Rugged Phone S90 from DOOGEE and its worth every penny & can't say how many times I have dropped it, put into water etc; this survives it all, Real tough phone for its pricing.

True, I refuse to buy a phone with a notch. That means any samsung phone is out of the question for me.

I'm interested in Xiaomi's Mi Mix series, full screen design with no notch, slidable design that hides the camera which is pretty cool. The latest one is the Mi Mix 3 5G, but I think i'll wait until next year and get the mix 5 (mix 4 will come out some time this year, mix 5 next year, my current phone is OK at the moment, mostly software issues and poor battery life)
