LATEST UPDATE

NEW UPDATE RELEASED!!

v4.7.2

1. Inbuilt & Private SMTP Updated
2. Multiple instances of same Email address in logs fixed
3. Sv4 Improved for Custom SMTP
4. Total Emails loaded and Total Emails Sent stats added in logs
5. Logs configured for Inbuilt SMTP
6. New feature added "Maximum Performance" for Sv2.7 resulting in increase Sv2's delivery speed
7. Recommendation for removing invalid entries added while adding Email/Contact list

v4.5.0

1. Select sender Algorithm

Now you can send your mails by using either of the 2 Sending Algorithms. Sv2.7 & Sv4

Sv2.7

Sv2.7 - is an older and more reliable algorithm that CyberBomber used until update 4.1.0.0.

However to reduce the sending time for huge campaigns, the algorithm was replaced by Sv4.0.

Sv4

Added with the release of CyberBomber v4.5.0.0, Sv4.0 is a faster, more efficient algorithm to send out mails for campaigns. The algorithm also displays live logs while the campaign is running.

2. Use IP Address as Host

Following is the Sales Thread

Recent Updates

~Spoof Username~

~Added Reply-To Email~

Following are the screenshots demonstrating functionality

New Features Added!

~Inbuilt SMTP Added~

~Added Auto-Code~

~Multiple SMTP Support added(Use multiple SMTPs to Bomb Email lists)~

Stanley - January 30, 2020, 4:05 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

vidpromoter - January 30, 2020, 10:28 am

Interested in buying your 6 months package. Sent you request on skype as i have few queries.

driltip - January 31, 2020, 3:07 am

I have used your product for 6 months and the deliverable rates was good because of the multi smtp random pipeline sending, but gt please consider adding tags your cyber bomber to bypass spam filters with random tags like below because now emails contents scanning is becoming a problem now.

[+] GENERAL USAGE

##email## (email receipient)

##date## (Generate date time in GMT format)

##Seconds## = Get Seconds

##Minutes## = Get Minutes

##Hours## = Get Hours

##LongTime## = Get LongTime

##LongDate## = Get LongDate

##ShortDate## = Get ShortDate
##TIME## = Get TIME
##LINK## = Random Links
##ANDROID_OS## = Random Android OS
##ANDROID_BROWSER## = Random Android Browser
##APPLE_MACBOOK## = Random Apple Macbook Device
##APPLE_PHONE## = Random Apple Phone Device
##APPLE_APPS## = Random Apple Phone Apps
##IP## = Random IP
##EMAIL## = Get Email Target
##DATE## = Get Date
##UNAME## = Get Username From Email
##UDOMAIN## = Get Domain From Email
##RANDOM## = Random Text And Number
##FAKE_NAME## = Get A Fake Name
##FAKE_ADDRESS## = Get A Fake Address
##FAKE_DOB## = Get A Fake DOB
##FAKE_PHONE## = Get A Fake Phone Number
##FAKE_MAIL## = Get A Fake Mail
##FAKE_CARD## = Get A Fake Card Number
##EMAILB64## = Email in base64

[+] RANDOM USAGE

##random_number_10## (Generate 10 random number)
##random_letter_10## (Generate 10 random letter mix UPPERCASE or lowercase)
##random_letterupp_10## (Generate 10 random letter UPPERCASE)
##random_letterlow_10## (Generate 10 random letter lowercase)
##random_letternumber_10## (Generate 10 random number and letter mix uppercase or lowercase)
##random_letternumberlow_10## (Generate 10 random number and letter UPPERCASE)
##random_letternumberupp_10## (Generate 10 random number and letter lowercase)

let me know if you consider doing this in the future gt?

I have replied on Skype mate. Have a great day.?

(Jan 31, 2020 08:10 PM)motuary Wrote: [\[CITE\]](#) Mate SMTP is an issue this day. I need a software I will use without the headache of SMTP. Does this application solve my problem. Please respond.

Yes absolutely mate. CyberBomber's 3 Months and 6 Months packages comes with Free private SMTP and 1 Month with Shared inbuilt SMTP as of current deals so you don't have to worry about an SMTP all the time. The software and the products delivered with it are all maintained and updated time to time + you have 24/7 support. ?

Zinx™ - February 1, 2020, 11:19 am

how many inbuilt SMTP have you added?

GTrails - February 1, 2020, 12:05 pm

(Feb 1, 2020 12:19 PM)_Karma_ Wrote: [\[CITE\]](#) how many inbuilt SMTP have you added?

Cyberbomber 1 Month packages work with 5 shared SMTPs however when you get 3 Months or 6 Months packages you get to have your own private SMTP mate.

motuary - February 3, 2020, 1:09 am

Since this is a shared IP for all the customers, how then can you guarantee delivery of all the emails sent. We have any sending limit? is it possible to get a dedicated IP? What is the cost ? and how to open a contract?

GTrails - February 3, 2020, 1:51 am

(Feb 3, 2020 02:09 AM)motuary Wrote: [\[CITE\]](#) Since this is a shared IP for all the customers, how then can you guarantee delivery of all the emails sent. We have any sending limit? is it possible to get a dedicated IP? What is the cost ? and how to open a contract?

The shared IP/Inbuilt SMTP is only for 1 Month Packages. When you buy a 3 Months or a 6 Months package you get a private SMTP/IP mate. There are no extra costs, what you see is what you pay.

(Feb 3, 2020 02:09 AM)motuary Wrote: [\[CITE\]](#) ...and how to open a contract?

To Open a contract click on the "Buy now" button under the "Purchase now" tag which can be found at the beginning of the thread.

Buy Now button snip. (Go to beginning of thread to find this.)

You might have to enter UID after you click on "Buy now" button, if you're asked enter '3850617'. Ultimately your contract should look like this...

motuary - February 3, 2020, 4:15 am

Thanks for the explanations I appreciate, finally what is the daily sending limit? If smtp is blacklisted before 2 weeks of your "routine smtp change" do you offer replacement?

GTrails - February 3, 2020, 4:29 am

(Feb 3, 2020 05:15 AM)motuary Wrote: [\[CITE\]](#) Thanks for the explanations I appreciate, finally what is the daily sending limit? If smtp is blacklisted before 2 weeks of your "routine smtp change" do you offer replacement?

The SMTP you get with 3 Months and 6 Months packages has unlimited bandwidth. You can send as many emails as you like. Also to avoid situations where your IP is blacklisted, we do IP rotations regularly to keep up with your inbox rates. However for any cause if the IP or SMTP goes down, it'll be replaced for no cost.

motuary - February 3, 2020, 5:58 am

Thanks for your explanation, you did not mentioned How regular you would be rotating the ip address . However I have opened a contract. kindly respond to me on the rotational period and also accept contract

GTrails - February 3, 2020, 6:43 am

(Feb 3, 2020 06:58 AM)motuary Wrote: [\[CITE\]](#) Thanks for your explanation, you did not mentioned How regular you would be rotating the ip address . However I have opened a contract. kindly respond to me on the rotational period and also accept contract

Whenever any of our IP is blacklisted, then the SMTP that was associated to that IP usually undergoes IP rotation or if a user specifically requests an IP rotation.

Also, I have accepted your contract mate.

motuary - February 3, 2020, 7:02 am

payment has been sent. Please confirm and revert.

Thank you

your skype does not work !! I would like to take the 6 month pack

your skype is not working !! I would like to take the 6 month pack

protons - March 14, 2020, 9:37 am

My concern is how many cold emails can I send in a week or month using this software.
I have huge list that I want to send mails to.
Would like to buy six month pack.

vidpromoter - March 16, 2020, 5:21 am

op is not coming online on skype (even it shows he is online) . The emails are not going using inbuilt smtp. Messaged op on skype but didn't received any reply.

zarentokc - March 17, 2020, 2:41 am

Op this is a week now I bought your 6 months package. I have neither been able to use the SMTP provided or the software. You are always on skype but won't respond to messages. I will dispute if I don't hear from you in 24 hrs.

unusualdd - March 17, 2020, 2:44 am

Ya I don't see inbuilt smtp either - how do I configure it? It's asking for me to input one.

He was last seen 6 days ago on skype.

peterowen - March 17, 2020, 7:44 am

wonderful features. i will try this .

bosshnic123 - March 18, 2020, 10:12 am

I bought cyberbomber but am still waiting on product

hunter - March 19, 2020, 6:14 am

hello, I received your smtp, but since the first day I meet problem in the sending of mails, I contact you on skype, whatsapp and gmail but without any response from you

mic141414 - March 19, 2020, 6:47 am

Same here

Never received the new fresh smtp promised twice a week
Software kept crashing for me on rdp

Total waste of money so freaking disappointed i wasted my money

(Mar 18, 2020 10:12 AM)bosshnic123 Wrote: [\[CITE\]](#) I bought cyberbomber but am still waiting on product

bosshnic123 - March 19, 2020, 6:07 pm

I received it today....but will go thru it later to see everything

GTrails - March 30, 2020, 2:03 am

The project was not being actively provided time due to some reasons for the past few weeks. I am back online and taking orders. For those with any queries or issues with their recent purchases can contact me on Skype again.

(Apr 11, 2020 04:40 PM)Airbandit Wrote: [\[CITE\]](#) not really as advertised, when you buy it you will understand what i mean.

If you have any queries, PM me on Skype. I also release updates for requested features.

Here are some frequently asked questions...

How does Multiple SMTPs work in CB?

When you add multiple SMTPs and start a campaign, the tool will check if an SMTP can send, if SMTP is bad, it shifts to next SMTP randomly or in sequence (you chose this before sending) and removes the bad SMTP from SMTP list to maintain a fresh list always. When all the SMTPs catch an exception, the campaign stops.

A detailed view of what happens while sending campaign can always be seen from the logs file. It tells you which email was in the process of sending, what SMTP was used to send, its status, and errors if any.

What's going on with the Inbuilt SMTP?

CyberBomber comes with an inbuilt SMTP that you can select for sending out your campaigns.

This inbuilt SMTP is refreshed once it gets blacklisted to any one of the Mail Servers. Once a Mail Server blacklists the SMTP, it's IP is rotated and a different IP is allocated to it. The process is automatic.

Also, inbuilt SMTP has unlimited bandwidth so you can continue to send as much emails as you want.
