Thread: [Website Shell/backdoor](#)

Tok Pengait - January 28, 2020, 10:34 pm

im able to shelling some sites but none of them are able to symlinking, i did some research on google/youtube but none of them are working or mybe need some updated method .. really need someone who can guide on it ?

mObile - January 29, 2020, 1:53 pm

Did you use a script to symlink? ..of did you do it manually?

[TUTORIAL:]>_HOW TO "MANUALLY" SYMLINK_[/Step-by-Step & n00b Friendly]

is it possible for you to extract a whole database from an certain website for me? so yes what will it cost .

they also have a app in the play store .

they have a price list of items that i need but its only visible when they aprove my account and they will never do that.

Ramb0x - February 23, 2020, 4:24 am

small amount if you got shell on server yet.

Hacked free VPS enjoy ;)

51.161.11.57 port 28

user : ubuntu

password: b1to63pG&vT

th3darkly - March 15, 2020, 5:20 pm

anyway most hosting companies now using Security cagefs
just you need Manual method if you want bypass
