the below is a dramatisation of things that may have previously occurred on hackforums, however I don't believe many of the people currently here have the traits described below

Smexy - January 29, 2020, 3:00 am

Hackforums = bunch of virgins pretending to be some whore because identity theft is a joke to them.
I hope just like stressers/ddosing that identity fraud will be illegal on here.

V?rt - January 29, 2020, 3:02 am

Man the inspect element killed me. I feel like Hf has gotten much better about everything though lol

Citoo - January 29, 2020, 4:04 am

Well I can't say that I didn't do those things about 6-7 years ago ?. I thought I was so dangerous to anyone on minecraft that dared to oppose me.

But at least those things sparked my interest and now I actually want to learn more about the actual hacking.

passCODE - January 29, 2020, 4:10 am

Is anyone here for hacking these days? Feels like it's all about monetization.

Good old days lol. Now it's only about marketplace...

Mr. Robot - January 29, 2020, 4:50 am

I fixed it with mine. I do all of these monthly what ya saying OP?

Let's justify them.

Black hoodie, sure why not?

Googling 'how to hack' often is extremely helpful in finding new people to the scene and seeing what's new. I often find methods I use have been refined by someone else over time.

I'll dox you/ip/hack/get into - all reasonable? What's the issue.

I have hacker friends - well I do. And if you keep talkin smack, they will.

Anon masks, well shit why not.

Incognito is handy.

CMD + color 0A + pinging - all completely reasonable and you can still take down servers and retrieve important information by specifying packet size.

vbscript - don't see the issue?

Worship' might be a strong term but seeing as I am not religious, holding someone who has experience at a higher standard could be considered worshipping.

How to look like you're a pro hacker? You read that article, it's great.

Yeah it really is. Security is easier than it used to be so hackers have to be way more skilled so it's a dying skill in my opinion.

Stork - January 29, 2020, 10:00 am
