There is no fool-proof solution for gambling but there are ways of leveraging the odds to your advantage. The OP's guides cover this a little and shows a way to have slightly higher winning odds, however if you have experience in the market used you'll have higher win-rates from the start.

All guides are written very well and easy to understand. This definitely has the ability to earn money, and isn't saturable. I'll be using these from time to time as I've personally been wondering where to start with this strategy recently.

The ROI is entirely dependent on how much you invest, there's very little time required.

It's obviously whitehat and legal, 90% safe means secure gain. Unfortunately I don't have a great mastery of the language because I'm not a native speaker.

Btw if you have any question i'll be happy to answer, you can also contact me on discord or via pm :)

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
