Thread: [\[FREE 100%\]CLOUD ONLINE SERVICE - FREE-CLOUD.ONLINE - 25 GB \[GDRIVE/ICLOUD SIMILAR\]](#)

MadLabz - January 31, 2020, 5:58 am

I am happy to provide you all a free service for store/sync/backup your files from any device (Windows,Linux,MacOs,iOS And Android)

As i am opening this thread i am going to provide a base FREE plan of 25 GB of storage [PRE-ALLOCATED] , the space will be freely upgraded while the service will grow and users base will increase.

List of Features (so far - and is not finished yet)

- Light/Dark Themes
- Personal Activities and Shared files Activities reports
- Calendar
- Checksum
- File tagging
- Comments
- Contacts
- Trash Bin
- End-to-End Encryption [NOT MANDATORY BUT HEAVLY SUGGESTED]
- Online archive extractor
- Share via Social or E-Mail
- Metadata editor/viewer
- Real time notification
- Password Policy [No common password allowed sorry]
- PDF viewer
- PhoneTrack [Work only if you authorize it]
- Mail alert on quota limit reach
- Ransomware protection [prevents uploading files with known ransomware file endings]
- Video Player
- View photo online
- Cellphone complete syncing via the app
- And much more

- Thing to do if the poll will reach enough vote
- Antivirus scan based on ClamAV
- Video Conversion for your own video(s)
- Guest access shared to who you want
- Two-Factor Authentication via push notification
- Server Side file encryption [it may increase your file(s) size up to 30%]
- Self request for get your whole cloud zipped and delivered to you
- [MAYBE]Adding some 100% non invasive advertising

Active Limitations

Max file size upload via browser is 2GB x file

Inactive users after 180 days in a row without any login will be deleted (their files too will be deleted)

i am adding ram and hd space , my apologies about any downtime. As the service grow i add always more resources for not slow down you.

edit : updating also the software side .

hint : use the client for uploads and sync files , the web uploader is limited in file size , is for use the already uploaded file mainly (it support up to 99mb x file)

audio player , metatag and checksum checker added :)
