I just updated to version 1.0.2, enabling the optional export of username, uid, and/or fullname string. The full name string seems to also work great for outbound adding on snapchat.

Master - February 4, 2020, 7:59 am

I just added a video :) Enjoy!

If you decide to give any vouch copy then please count me, in exchange I will give an honest review.

Master - February 4, 2020, 10:07 am

M add me on skype or discord.

Master - February 9, 2020, 11:26 am

Updated to 1.1.0:

- Previous Minor Updates majorly improved networking compatibility.
- - Fixed the blacklist label on statistics panel.

~Norm

Master - February 20, 2020, 12:21 am

This tool is now sold by the year.

Master - March 1, 2020, 8:24 am

Rate Limit Bypass confirmed!

Master - March 29, 2020, 12:00 am

Just updated to 1.1.2! More improvements on dynamic variables for country scenarios.

papa123 - March 29, 2020, 12:31 am

Hi guys,

I want to give you feedback about the Ibex tool. I got a review copy two days ago. The setup was very easy and straight forward. All scraped users are fresh. I got small issues on account validation but thanks the man solved it on time through Team Viewer.

Are you still selling Instagram Inker? I was the person who wanted the vouch copy? Check discord.

FelixIn - March 30, 2020, 11:12 pm

Does this only support followers scraping from a username ?

What about other types of scraping ?

Also, do you need your own IG accounts added for scraping large accounts ? As far as I know IG limits scraping per account to 10k followers max , unless you got multiple accounts ...

Yes it does support followers scraping by username, can even loads thousands or millions of usernames or single username depending on mode you want.

As far as other types of scraping, it can export the Username String, UID, and username associated with the scraped account.

You do need instagram accounts, adding a new account bypasses the rate limit. I have some clients literally using 10 accounts they created on their own IP/phone and do not even need proxies. This may not be the case for everyone though.

As far as a 10k followers max, i have never run into this or heard anything about it.

Master - August 7, 2020, 11:33 pm

Ibex just updated to 1.1.7:

- Fixed issues preventing some new login attempts
- Validated Functions

~Norm

tracky.h2 - September 4, 2020, 12:54 am

Hello,

I have an Instagram account and I don't have the password and mail address of it anymore. I only have the username.

Can I find out the password with your tool ?

I have no proxy list, no list of passwords.

I need as a complete program with all "services".

Zixruh - September 25, 2020, 8:36 am

So is this just to track new followers when you're gaining? i'm not understanding.

Master - September 25, 2020, 8:40 am

Instagram Follower Scraper with account priming to bypass scrape rate limits.

funtela - September 25, 2020, 1:39 pm

Can you provide some examples of what can be scraped/achieved using this tool?

Master - September 27, 2020, 10:56 am

Hey Funtela, I think i remember you from years ago!

Cool to see you.

So its "basically a instagram follower scraper"

What makes it different/powerful?

- Allows priming of unlimited accounts, which safely dequeue a master list o parents to now only scrape, but also monitor for and export new users only.
- For every account primed, the rate limit is bypassed for scraping.
- Live exports by parent username which can be utilized in any tool. Like Serval for example to check usernames on snap.

What is coming int he future with it?

- Email Scraping
- Entire Bio Vitals Export

Actually yes it could be used for that too. Perfectly in fact. Cool perspective.

mic141414 - January 26, 2021, 9:02 am

Hi

Very interested ... still alive ? can it get now emails ? thanks

aurianaa - February 14, 2021, 9:20 am

i'm interested about the software, but i try many similar tools and all my account burning so fast or the IP banned too.

I can scrape emails now ? (in bio and contact button)

what's strategy you recommended me with your software ?

Master - February 15, 2021, 1:14 pm

11 Hours left for discounts on the entire suite. <https://mailchi.mp/stormobservers/11-hrs-rem?e=h>

unusualdd - February 25, 2021, 10:01 am

No facebook tools? I only see instagram, snapchat

Jeffr0 - September 24, 2021, 2:39 am

Every time I use this tool I get "touching consumer failed". Can anyone explain how to fix this?
Thanks
