Thread: [Need advice dropshipping from Aliexpress to Ebay.](#)

Takehito Morokuzu - January 31, 2020, 5:54 pm

Hi,

I want to start dropshipping from Aliexpress to Ebay anonymously.

I have successfully made a paypal and ebay and made a draft of a listing.

Everything seems fine, but when I try to post the listing, I get this:

Any advice would be helpful, thanks :)

Stanley - February 1, 2020, 4:35 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Are you sure you want to do dropshipping? It would take you some time to actually get into it and make good profit. The people that try to do dropshipping now are a lot. If you would have done it like 5 years ago it would have been a lot more easier. But now you have a lot of competition and a lot more people know about aliexpress so I wouldn't recommend it.

Geralt - February 1, 2020, 5:06 am

I've never seen someone dropship from Ali to eBay, they are basically the same thing, you can't sell the product for double the price like you would on Instagram or facebook.

Really?

Cheapest product on Ebay in £350. On ali it's £250 for the exact same product. And it is selling a lot on ebay even for £350.

Instagram or facebook.

£350 on ebay, £250 on Ali... I found several products that follow this pattern, both of which are popular on both platforms because even the higher ebay price is a good price for the product.

Now that changes things, do you have a seller's account on eBay? There is a difference between regular accounts and seller's.

If that's not an issue, make sure you have Automatic Payments enabled in Paypal, should be somewhere in Settings.

You are in the UK, so did you try to sell on ebay.co.uk instead of .com?

Also try logging in and out of your account a couple of times a day, could be some random issue.

TBH I just used a Whonix VM (secure connection through TOR) and I think that has something to do with it. I would make an account without one however I don't want it to interfere with a real paypal account.

My accounts are all on default settings. Most of the time it is not letting me login to my PayPal account, it just tells me to contact support.

If you've done this stuff before PM me, maybe we can work together on this ?

This is strange, are you doing stealth?

Takehito Morokuzu - February 1, 2020, 11:41 am

What do you mean?

If you mean trying to do it anonymously, yes, I'm using Whonix

If you mean trying to do it anonymously, yes, I'm using Whonix

I meant the errors...

Are you using TOR or a RDP?

Takehito Morokuzu - February 1, 2020, 12:13 pm

Are you using TOR or a RDP?

TOR in a Linux VM.

I actually tried on my main system but with a VPN. Same error

They will limited/suspend your paypal and ebay account for using TOR and VPN's

You need to use a dedicated ip RDP or your Cell Phone Data ip.

Seriously, going stealth and doing it right is a lot of work at first. If you screw up you will lose it all :(

There's also the fact of do I need to verify with my ID?

Rsynced - February 1, 2020, 4:46 pm

(Feb 1, 2020 02:22 PM)Takehito Morokuzu Wrote: [\[CITE\]](#) Right.

Yes, correct, I am sending you a PM.

There's also the fact of do I need to verify with my ID?

A way to do this, you could get a static residential IP and make this PP account.

A good residential is Comcast residential IP. Or maybe just use Google RDP from US, UK or something like that.

Would work.
