Thread: [Geekey.net - DIGITAL DELIVERY MARKETPLACE](#)

KeySender - February 1, 2020, 1:50 am

<https://www.geekey.net/>

*Soon I will add Multi-vendor option so sellers can list their products.

haksxsx - February 1, 2020, 4:55 am

Site is okayish, loading fast for me

but the currency is sticking out to me, make it geotargeted or just provide a simple dropdown in menu (better with flag)

Also as with user experience accessibility is great that you have there, but the filters are best showcased on left sidebar

and on the footer your icons are large and unnecessary.

Also brand your store

> Create a logo (either text or anything) use namecheap logo maker for free

> Change the shade of accent color, make it a little darker since it's not properly visible

I hope it was helpful to you.
