I appreciate it, but that render only took 2 days to make (just a concept and some visual idea). I'll be creating a futuristic map application that people can use to navigate. Using Blender, Python, and some Javascript. Still 12 weeks left, and a lot of work to do.

I'm gonna have to go check out Blender then! I've heard a lot about it but never even looked at what it is, I've been trying to get into 3D work like the stuff you posted but Photoshop can only do so much.. and god help me when I try using Cinema 4D haha!
