Stable income with automatic Forex trading.

I offer a trading robot to increase your income.

The robot has been tested and shows good results for 1 year

Monthly income ranges from 15% to 40%

The algorithm robot:

The robot opens certain orders that must be closed in plus, puts an automatic take profit, if the market

goes to the other side, the robot calculates the desired volume and takes a compensating order putting take profit on 15-20 points

from the price at the moment, and on negative orders sets the same take profit that put the last order.

Thus, when the market turns, orders are closed by one take profit, orders that were taken initially are closed with a minus,

and compensating orders with a large volume are closed in plus and the total for the pair t/p comes out plus.

Expenses that you could start earning today

the robot 550\$

remote server \$ 3 per month

Deposit from \$100

Conditions:

1. Registration and opening an account on [forex4you.com](#) by referral link.
2. Verification at the broker (passport scan of 2 pages)

From us you get:

1. Learning to work with a robot.

Forex4you services are not available in US, Japan, Canada, Australia and European Economic Area residents, might be important to put in the OP.

Also I am suggesting you guys don't buy this sorry OP, but the fact your pushing your affiliate link makes me feel like this bot is just going to open many daily orders. Giving OP huge commission returns.

To give you guys can idea. If he sold this robot to 20 HF members.

OR I COULD BE AN IDIOT AND IT WORKS. WHO KNOWS.

We can work by installments, according to this scheme, if the license is not paid, the robot will turn off automatically!
