Thread: [ANDROID TESTER 4.6.1 \[OPEN SOURCE\]](#)

dump channel - February 4, 2020, 1:57 am

HII

as u guys know android tester is now open source so like mobihok 6.0 we need screenplay feature in ANDROID TESTER ??

so its now open source i can add that feature ??? but i dont have screenplay source?? did anyone have source of screenplay?

plz reply if anyone have ????

and we need link open by browser feature also if anyone can help me that can be done????

thax for readinggggggg??????????????????

boiiiiiiiiiiiiii

Karahan Seelim - February 4, 2020, 2:45 am

do you have the fud for mobihok?

I can help you to create a best fud for apk of any RAT including mobihok 6 will disable the notification. Bypasses Eset, Kasperskey, Only detected by IKARUS and VirusFighter FUD 2/32. Also bypassed device security including Samsung, Redmi, Poco, OnePlus, Oppo,Vivo, Nokia, Huwave, Motorola and many more.

no not yet .. why?

Hidden Root - February 18, 2020, 1:50 pm

I can fud any android payload and android rats including Spynote6.4 as well as all the versions of the spynote, 888RAT, Metasploit, The Fat Rat, Android Tester, Warzone android, Spy Max(all versions), Mobihok(all versions including the latest version), AhMyth,Safeko(SAS RAT) and many more..

Ive successfully bypassed Play Protect, Device security and Antivirus. Here ive provided the demo video(video proof)

Ren And Stimpy - February 20, 2020, 1:20 pm

The screen record is pointless as the appears on the phone and user has to click accept or can simply block the alert

ping010101 - February 20, 2020, 3:38 pm

anyone can share the link for the main leaked source code Thanks

Dark_Lion64 - February 21, 2020, 1:40 pm

What on earth is this clusterfuck of a thread?!?

(Feb 20, 2020 02:20 PM)Ren And Stimpy Wrote: [\[CITE\]](#) The screen record is pointless as the appears on the phone and user has to click accept or can simply block the alert

Yeah on non-root devices its pretty useless, but with root its possible to either hide the notification or use another method to capture the screen

Hidden Root - February 23, 2020, 1:25 pm

U can use a program like team viewer host for the androif or can code simlier program in android studio, you can also get openspurse projects similer to team viewer host(search on google) and do the automation stuffs using linking/api
