Thread: [Help! Can't change Windows default search..](#)

BilliGates - February 5, 2020, 9:28 am

I have tried SearchDeflector,EdgeDeflector....nothing changes. Can't get rid of Bing search on web. Any tips/tricks? ?

Camf ? - February 5, 2020, 10:46 am

Check this article,

<https://www.howtogeek.com/224159/how-to-disable-bing-in-the-windows-10-start-menu/> It has downloadable files to fix the issue :)

BilliGates - February 7, 2020, 12:59 am

Thanks for helping. But this guide is only to disable Bing and web search. Any ideas how can I change it to DuckDuckGo or StartPage?

Hello buddy,

What about this one ? <https://www.laptopmag.com/articles/change-cortana-search-engine>

Looks like there is DuckDuckGo too

Don't forget to tell us if it worked

BilliGates - February 7, 2020, 1:34 am

Nope.

The funny thing is after I have installed SearchDeflector (<https://github.com/spikespaz/search-deflector>). It worked only for the first time.

After that Windows forced me to use Bing again. I have tried to re-install SD few times,it never worked again.

Btw,I'm using the latest version - Windows Home 1909.

Hello guys,

I read an article related to this problem which is known by Microsoft, only need to update your OS to fix the issue.

If some still encounters this problem, here it is :
