my translation from google:

vs

the ?? characters inside look the same so it must be death. the 300 number thing means cured.

this is really insane.. of course it could be their troll or worker mistake, or intentional "mistake" from worker.. but who knows?

Geralt - February 5, 2020, 7:05 pm

There is no way that death rate is 16%

Graybyte - February 5, 2020, 7:13 pm

Someones getting "fired" for sure

Citoea - February 6, 2020, 2:14 am

Imagine exactly 25000 people die tomorrow from the virus and everyone turns to the person who made the mistake as some sort of messiah.

Luca - February 6, 2020, 4:46 am

The number of deaths seems too large compared to the number of infected

Exe - February 6, 2020, 4:51 am

that shit is planted to kill the over populated chinese ppl

SIM-3323508 - February 6, 2020, 7:28 am

personally i believe the death rate is higher than 2%

Fivio - February 6, 2020, 7:38 am

That really depends on a lot of factors. We cannot know for sure.

Nate - February 6, 2020, 10:52 am

I think theres a lot more death then that to be honest with you.
