Thread: [The Amazing Sinner's Help Desk: Beginner Hacking!](#)

The Amazing Sinner - February 6, 2020, 11:11 am

Simply leave a post stating what you need help with and we will discuss via PM and I will help setup anything via Teamviewer, or if you're just questioning something you're unsure about I'll gladly help if it's reasonable.

Don't expect me to spoonfeed you, don't post nonsense such as "Where should I start?" because that's of your own choice.

I do not tolerate flaming take it elsewhere.

There is malware available for Mac OS, check out Netwire, they support Mac OSX:

<https://www.worldwiredlabs.com/>

or use EvilOSX: <https://github.com/Marten4n6/EvilOSX>
