Thread: [SIMPLE RAT SPREADING GUIDE](#)

Anon-420 - February 6, 2020, 1:14 pm

Hello HF, just finished setting up your rat but don't know how to spread? here's a basic tutorial on how to do so :)

Method 1 - Youtube spreading

1. Download random youtube video about cheats/hacks for popular games(eg. roblox, csgo, fortnite)
2. Crypt your rat file using any good crypter(eg. spartan crypter, bytecrypter, code protector, aspire crypt)
3. Upload the video on your own channel and put a download link to your rat
4. Do this with 5 to 10 vids per day to get more spreads

Method 2 - Facebook Spreading

1. Find cracking or cheating facebook groups
2. Crypt your rat file
3. Spam it saying it's a cheat or cracking tool

Method 3 - Business Spreading (requires FUD doc or pdf exploit but is very worth it)

1. Get a doc or pdf exploit
2. Create a infected doc or pdf with your rat file
3. Go to the website of a business
4. Get the employees email addresses
5. Mass mail them with your infected doc file attached to the email saying it's a report, job resume or some Clay Davis like that

Thx for reading and hope this helps :)

I think you forgot a step.

6.) Get arrested

6.) Get arrested

You use an RDP or a good vpn that doesn't keep logs to avoid that :)
