Thread: [DOUBLE YOUR MONEY GUARANTEED \[15TH FEBRUARY\] FIXED BETTING TIP \[100% SECURE PROFITS\]](#)

Vantos - February 6, 2020, 4:49 pm

I am having information 3-4 times per month for manipulated soccer games every month. I've been working with this source for 2 months already and made bank with his tips. Since I am not allowed to sell these games in my country, I decided to put them for sale online. Odds are always 2+
All the games are available for making bets on the majority of big bookies (including Bitcoin ones)

The next game will be played on 15th February

I will be increasing the prices for the information after every game.

Discord: Vantos Fixed Betting#5950

I am always down to using a middleman if you like.

The prices for this game are:

-\$200

Pay after the game win option available for trusted users only

-\$300 if you want to use a middleman (If you choose this option - I will be also sending the MM \$300 so he can place a bet with them)

Willing to provide the game for free to 2 users as a vouch

Terms Of Service:

Spoiler ([Click to View](#))-You are not allowed to sell these games anywhere

-You are receiving the information 24-48 hours before the start of the game

[contract=tid]Start Contract[/contract]

I've got a bit of experience with sports betting and would be happy to throw down \$100-200 on the next game as a vouch.

The OP will provide me with a vouch tip on Friday 14/02 for the Saturday 15/02 game. I'll put down a decent start bet and see how we go next week. The user showed me some of his last impressive

bets, and he's immensely confident of the no loss track record. Hard to verify without other independent reviews, but games like this certainly exist in the world.

Just a reminder that every single thread that has claimed to offer "fixed matches" that are worth tens of thousands of dollars for pennies in the last 2 years on HF has resulted in a scam report or closed account.

Just a reminder - I stated I will sell them cheap to attract as many customers as possible and I will be increasing the prices after every round. I have customers from other forums that I work with from a couple of games already and they are paying me few k per game so eventually the prices here will go to 1k+ (just need to prove myself for 2-3 games)

What has to do the Bustabit thread with that one ?. That guy got mad because he couldn't code the script and take my money and he started flaming

Here is a proof that the user TCP is an unprofessional coder and started sale trashing me because he couldn't code the script and take my money. I want an apologize from you for judging him by the lies of that person

And now the response of the quoted user once I sent him the proof. If these people can determine if I am credible or not, there is something wrong here

He literally signed up to HF on his multi yesterday and immediately started selling "Fixed Matches", something you can't even find on the darknet and is worth tens of thousands of dollars for \$200.

He was -11 rep 24 hours ago and posted a fake member contest with a requirement that upgraded members +rep him so he gets back green lmfao.

You have to be an absolute fucking degenerate to fall for this guys pitch.

If he indeed had fucking fixed matches he wouldn't be selling hem for 200\$ on retarded fucking HF, he'd get a credit loan of 50k and flip it into 1M within 2-3 months.

I don't hate, I am just 100% confident that this is not legit and I hate to see people believe that you have some kind of fixed games.

I know how this market works since I work in the betting industry. I repeat people that have the ability to fix the games are often powerful people and they don't just give out such information to anyone (they barely give the information out to someone since the more ppl know this the bigger chance they get arrested)

So my question is why would someone rich and powerful guy risk getting arrested to give out his secret to a rent boy selling the games on a forum for 200 bucks? Do you realize how cheap 200 bucks is for fixed games? Fixed games mean free money because there is no chance of losing when you place the bet.

Now please close this thread and skip this bullshit, try this shit on Facebook or Instagram where all the nigerian&Serbian scammers trying this.

This is a big illegal activity, and I hope that people do. not fall for this.

When we have fixed games on the agenda on our company we can see it directly since we see that a lot of ppl put high stakes on a risky game on a low division, most probably I as a trader just deny those bets and close the game for more incoming bets. For people that use your service in countries in Europe most probably they will get investigated since we send the reports to the local police department especially if they play under a European gambling license.

And I can tell most ppl right now, don't think that you will be able to play 1000 USD on a fixed game, I work as a sports trader and if lets say 10 ppl place a huge stake on a fixed game, that game will probably have a max stake of let's say 5 USD because of the suspicious activity, and I can guarantee you all that this guy does not have a fixed game, let say the game 15th of February if he gives it out, how are you gonna be able to verify that it is a fixed game and not just a game he just chanced on?

I really hope that this thread goes down.

EDIT: <https://hackforums.net/showthread.php?tid=5723789>

Have a look at my thread where I gave out free picks, my highest winstreak was 17 games in a row, you can have the same luck by giving out 4 games in a row and all becomes a win and then suddenly pretend that you have fixed games and require ppl to pay you high amounts and then boom you lose.

This is so ugly please close this thread.

Also one of my vouchers will have birthday on 15th so we will have a few reasons to celebrate. Can't wait for Saturday already :)

I'm curious to see how this turns out on the 15th. It's a bit hard to believe this is legit but every now and then crazy shit does happen.

Good luck to everyone who's buying.

I'm aware that there are many scammers pretending to be having information for fixed games and stealing people's money but we are not like them. Our organisation is really strong and the info is

indeed 100% legit. I already have some serious customers that are betting really big money on these games and everyone would be able to see that what I'm offering is 100% real :). There is nothing that can stop us !

I'll leave my honest reviews here after the game if you don't mind. I want everyone to know about my experience.

Edit 1: He sent me his bet proofs which he placed with local bookies in his country and I placed a bet on sportsbet.io after receiving the tip from him. Let's hope for the best.

The information is FT. Bookies already started giving extremely low bet limits for the game in the past 2-3 days, I don't want to think about HT/FT

So basically you can take a guess and then it's 50/50.

And if you win then people will think it's a fixed match and buy more for \$500.

If you lose you'll get scam reports but would've made +\$1000 effortless.

Seems like a win/win.

Won't be giving no apologize when it's a FT bet at odds 2.

Honestly, I don't care about your apologize at all. In my server, I have gathered all my customers (including customers I have from other forums that are working with me from a couple of games already and paying me way more than \$500). So honestly, I really don't care about your opinion. Everyone saw my bets are real, so w/e you say, it doesn't mind for me and my customers

OP has sent me the match yesterday. It was a picture of his bet slip that was placed on Feb 4th, and he showed me his winners receipt from a previous game. As far as I can tell, it doesn't look like anything photoshopped but will come back here posting the results of the game.

Honestly I would just chill with the harsh comments @Deal. I know it's sus af and people are risking their own money, but let them risk their money lmao. If they lose, it's their own fault for believing it.

Yeah and if they win they'll believe it's a fixed match and pay \$500. This dude is running a massive scam.

Yes, and how would you explain that I am putting over 10k on the game ?. You are spamming non-senses since day 1. You were laughing that my contest was just \$30, so I did a \$100 contest for you (you called it fake). Now when everyone working with me and seen the proof is saying this is real, you are again saying it's not.

Today I placed a bet and won 2000 EUR, it was Basaksehir to beat Besiktas the odds were 2.43, this dude can do exactly the same thing find a game and then tell everyone its a fixed one, baam it becomes a win and then he will pretend it was fixed.

Most of you are so stupid, just because he gives you 4-7 wins in a row you will never know that it is

fixed games.

A fixed game means guaranteed money, no one would ever share with you a way on how to make guaranteed money while risking your own money.

Why are some ppl so stupid I am getting so upset now!

I mean I'm getting it for free and can afford the loss. Whether other people decide to purchase it and bet is their choice.

In a way, your logic can be used on methods being sold here on HF. Sure, some are complete bullshit and are public af, but there are some that actually work with a great ROI. An example here is the method I used to sell (Instagram sells now). I sold for \$400ish a copy, people asked why I would sell it if it made me so much money. Reason? I wanted more money. You get what you're saying here though?

Sports betting is extremely expensive.. and groups that sell / set up fixed matches are extremely close knit and wary, if he somehow has legit games I wouldn't believe they'd last that long until he stops getting them and scams out.

And the low amount he's selling for is a red flag off the bat, he sells to what, let's say he gets this match right, and 20 people buy at \$500 (\$10k) that's normally on the low end of the amount legitimate groups charge one person. Most people that are betting on fixed matches are betting tens of thousands. If OP really had consistent fixed matches he wouldn't be selling on HF of all places for a few hundred, but then again idiots have sold under priced gold mines on here before so who knows

90% a multi too... whose first thought would be to create an account on hackforums and sell their gold mine LOL
