New methods leaked from a private group.

With this method you can easily get any gift cards for free from Bitrefill

I just tested and got free Amazon gift cards.

The steps are in the link below:

This is a scam, it shows the address of 15hcXSK1wqW4p8i8v7e3viVhg7ypx4rn64 when you try to send. If you do not believe me, copy the supposed script, go to ddecode.com, and enter it. It will show the fake message. Also, obvious scam because it 'requires' .026 btc or more to work.
