Thread: [Hide Awards](#)

Xerotic - February 7, 2020, 6:15 pm

<https://hackforums.net/myawards.php?action=sort>

Using the above page you can now toggle your award visibility for your profile. If you hide your awards then your profile and posts will have all of your awards removed from view. The feature to sort you award order has existed before this, but if you didn't know about it then now is a great time to check it out too! ??

All members have access to this feature. There is a 100 bytes fee to alter your awards display.

Thank you.

Also, earlier today we added some icons to the notification dropdown. Let us know what you think in the following thread where discussion is happening about it: [New Notification Symbols!](#)

I honestly wish it would kind of come back, but yea like you said I highly doubt it will...

Maybe in the Summer Holidays or something would be cool.

Wouldn't make sense for Omni to reopen it. All the less active members were selling off their awards for cheap and I'm guessing Omni got less award sales because of it.

More of it becoming a market to sell for actual money vs bytes. The whole point of the market was to sell for bytes but people instead used it to get real money out of it.

I really love this feature, which you can even add the option to hide awards for all members like how you can hide signatures. Makes browsing HF much more cleaner.

iNviZ - February 10, 2020, 1:51 pm

Actually a cool feature. Sadly I don't have enough Bytes to try it. Pretty damn cool though, your profile looks clean as hell. Maybe add one where we can do this for Lavish ?

I think this one is much better, giving the user to opt-out their own awards, not the viewer like your suggestion.

Im the guy who replied with tampermonkey script. hehe

It is a real shame you can only pick to hide them all and not select a certain amount of awards to hide at once.

Deleting awards that take time to earn feels like it would be silly to get deleted.

For instance. I want to have an all green award display one day and then the next I want an all-red award display.
