Hello,

These were originally part of Live Emulation Stealth server files that were leaked. They were a mess but me & some of my friends rebuilt it. I also went ahead & added some Kv Life, so it will work offline. Includes:

COD Bypasses(AW, Ghost, B03, B02)
COD Preset Cheats/Engine(look for yourself)
Halo 3/reach Cheats
BF4/BF3 Cheats
GTA Engine
Destiny Bypass
Config Menu /w Fully operational color scroller(like XBO online)

KV life is unknown, but add [this](#) to the XKE section & you should last a pretty long time. Also, sorry about the mess within the code I was experimenting.
