Thread: [NSA python training material \(free\)](#)

Tilcayo - February 9, 2020, 7:08 am

Someone released NSA training material (118mb download)

https://twitter.com/chris_swenson/status/1225836060938125313?s=21

The link is in the tweet, thought I'd share it with you all incase you missed it, enjoy.

(This is a python course that the NSA use to train people)

Heres the direct link nsa.sfo2.digitaloceanspaces.com/comp3321.pdf but you don't need to be logged into twitter to see the link. :)

Also, thankyou for that link!

gurlhackerclub - February 11, 2020, 2:53 pm

This looks great. Downloading now.

Lindros - February 13, 2020, 12:41 am

This is really cool, I'm going to check this out. Thanks.

EDIT: Checked it out, looks like similar shit to what I am doing at school for the most part.

the last 30-40% of it looks like new stuff I could use. Thanks buddy.

This is actually not bad at all. I expected it to be really basic and maybe not even real but it's actually well made. Thanks for the share @OP!

Lorem Ipsum - February 16, 2020, 4:29 am

Thank you for this incredible detailed training. I am not a programmer myself, but this should help me get started if I ever feel like expanding knowledge. A lot of pages, well detailed explain of the terms and 'codes' and that's only by browsing a few pages. Amazing share!

de_g3ntl3m4n - February 18, 2020, 11:27 pm

Thanks for the find cant wait to chec it out :)
