Hey I hit you up, looking forward to hearing from you

Update: Seller is not the coder of the bot, doesn't know much about it. Talked to real coder, barely speaks english properly, and doesn't know about fingerprints in Spotify bots. Said he does 800k to 1 mil Spotify Streams a month, asked for a screenshot as proof, didn't give it. Deal with caution, i'll change this if it changes.

These are bottled streams and followers tho, the spotify algorithm will notice and you'll get banned, no?

And with this, there's zero chances that Spotify ever puts one of your songs in a curated playlist.

facts. Sort of. Spotify doesn't notice if its not over the top and the streams are good quality, many people have several artists and get streams for profit.

Its been days now, coder and seller refuse to send proof of their claims that this bot can provide 800k-1mil streams without getting banned, guessing this bot is bullshit because the author didn't even know about spotify artists page, on artists.spotify.com. So yeaaaaaaah...

No one can guarantee you won't get banned, that's just bullshit.

No one said shit about guarantees. the CODER said he does 800k to 1 mil and refuses to prove it.

I mean let's be real, that's just lying. I imagine a person that can say that is also lenient to scamming, that's just my opinion though. And there's no AI in these programs, that's just bullshit, as for fingerprint, that's literally nothing besides changing user agent and some other things.

Thats what I'm saying man, and this dude don't know anything about it.

Working things out with coder. Will reopen when I get some proofs etc.
