Thread: [I want to build AI based intelligent botnet which can be controlled by audio](#)

3puz - February 10, 2020, 8:52 am

hey, ****, I want to build ai based intelligent botnet which can be controlled by audio and which will live in nerves of the internet until the end of the world so I want some chimpanzees who interested in this project and I think u are also going to interest in this project so here are the details that I can implement at my current brain.

a server like bots which are connected to each other using mesh architecture [encryption is a big part here]

there's also we need multiple servers 1 server for 1 (user aka hacker)for control and Adapters (plugins)

auto hack, scan, personal info database[Auto crawlers], search peoples , infecting USB, extract data from browsers.

and other stuff

my main motive was to create ai with knowledge of every person on earth

and finally, voice-controlled assistant which is the kind admin of our mesh network

[
only Developers of this project has access to this AI,
app doesn't work on another phone even if it's shared,
every user has different level access to mesh network(AI botnet),
one AI network for all users,
]

I want to add more features so let's talk about it.

if you have knowledge of any of this lang you can take part in this [*.net,c++, java, python,php]
I want payload in CPP for speed and size we also can switch to vb or any other it is just pre-planning of planing.

I repeat only Developers of this project has access to this AI

Quote:my main motive was to create ai with knowledge of every person on earth

I wish you good luck with this ?

Nachfolger - February 10, 2020, 9:38 am

This is the most retarded thing I've ever heard of in my entire life. You want a botnet voice assistant that also uses AI and lasts forever?

[Charger](#) ????????

Some people are so dumb that they'll fuck AI's capability (including OP).

Zinx™ - February 10, 2020, 9:47 am

Best of luck man will take forever to code

Charger - February 10, 2020, 9:55 am

AI is a meme word.

AI = a lot of abstract if statements

You might want to read up on what AI actually is, OP.

Little Foot - February 10, 2020, 8:16 pm

just buy about 50 alexas.

Crypt - February 10, 2020, 8:37 pm

[Charger](#) ?????????

Don't crap on the dreams of children.

I believe in you, OP.

Now if you'll excuse me I have to get back to my dream of world domination.

What?! Are you crazy? These are clearly some of the two finest minds of our generation, conversing about topics us mere mortals aren't even able to grasp.

In 10 years we will be looking back at this thread as something like the inception of the Google of the 21st century.

This thread, ladies and gentlemen, is where it all started.

Nulla Misericordia - March 17, 2020, 1:40 pm

I wanna commit suicide after reading this.

KyO - March 22, 2020, 10:04 am

wtf did i just read.....

I want payload in CPP for speed and size we also can switch to vb or any other it is just
pre-planning of planing.

I repeat only Developers of this project has access to this All am surprised and speechless.

Bluffer - April 9, 2020, 5:41 pm

What you described sounds more like Google right now.

Lindros - April 9, 2020, 6:35 pm

Jesus fuck that is a very vague fantasy.

de_g3ntl3m4n - April 10, 2020, 7:27 pm

i mean you really think any of this will be usefull enough, no need for all this BS, why have some
auto AI bot. Feel like this would be really nice and valuiable for OPs but bro i dont think you really
need this voice thing added unless you got some spare time on your hands

Bankcroft - April 30, 2020, 8:00 am

I knew a guy that could do AI in .net pretty good here on hf, but he would never ever affiliate himself
with 'botnets'. lol

Ensky - May 1, 2020, 12:50 pm

My man trying to create southparks troll trace

Flaws. - May 1, 2020, 12:59 pm

You are living proof that devolution is possible

BruteForce ? - May 2, 2020, 10:30 am

Wait voice assistant? What are you referring to?
