Does this service works with Parallax RAT or # RAT perfectly? Also what's the output extension? I'm also interested in buying.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

"SCAMMER". After I paid him \$120, he gave me a not working file , and he deleted the old chat, and added me to the ignoring list.
