- [You get a FREE \\$5 ON SIGN UP WITH REFERAL LINK](#)

- [Hey guys just wanted to make everyone aware of a new way to make money on the side by doing literally NOTHING](#)

- [According to their web page, HoneyGain "is an application which, when turned on, allows you to reach your unused internet's full potential by making your device a gateway."](#)

- [To put it simply, when you're on the internet you're not using its full potential \(unless you're massively downloading\).](#)

- [That is where HoneyGain comes in: they will use the remaining unused part and even pay you for that.](#)

- [They're transparent about this information and states that it will be used by data scientists for SEO monitoring, market research, pricing intelligence and alike.](#)

- [This is a standard digital marketing practice and nothing out of the ordinary.](#)

-
-

- [How much money have I made? At the moment around \\$30 off of my own internet.](#)

- [How to maximise earnings:](#)

- [Set up on phone and computer.](#)

- [Use parents wifi, your own, siblings, librarys, school, buisness etc...](#)

-
-

- [Frequently Asked Questions \(FAQs\)](#)

- [1. What is HoneyGain?](#)

[Honeygain is a crowdsourced network company that enables other businesses to conduct intelligence, market, and business research.](#)

- [2. Is HoneyGain Safe?](#)

[Yes, It is safe. They work with data scientists, fortune 500, and other trustworthy companies. And as the queen bee knows her bees, they know what every partner uses their network for.](#)

- [3. Is My Personal Data Safe with HoneyGain?](#)

[100%. HoneyGain doesn't keep any data from their clients. The only data they will have is what will](#)

be necessary for the service. This includes your email address, your IP address, how much traffic you make per month and your chosen payout methods.

- 4. How can I contact?

Feel free to reach out to through their website's contact form or through the Facebook page!

- 5. How data Scientists use my internet?

Data scientists use your internet data to solve complex problems like finding solutions for market research, ad verification, brand protection, pricing intelligence, travel fare aggregation, and SEO monitoring.

- 6. How is my payment calculated?

You earn credits for every KB of data you bring in. After collecting enough credits, you can convert them to USD.

- 7. How credits convert to USD?

10 credits are equal to 0.01USD (1cent USD)

- 8. What is the minimum payout?

The minimum payout is 20 USD.

- 9. What is the current payout rate?

You earn 1 credit for 10MB of traffic that goes through you. So for 10GB, you'll earn 1USD.

- 10. What payout methods are currently available?

Currently, HoneyGain support payments via PayPal, but more options are coming soon.

- 11. Does Honeygain work on Wi-Fi and mobile data alike?

Yes, Honeygain works both on Wi-Fi and mobile data. Mobile data have to be turned on in the app settings.

- 12. Is there a way to increase my earnings?

It's simple – install HoneyGain on more devices and have a device per network (let's say work or your home). That will help you max out your potential payout. (It's best when a unique IP address has no more than 3 devices)

- 13. What Networks does HoneyGain work on? What does the "Network unusable" error mean?

Honeygain only supports your Home and Mobile networks (IP addresses). If you are connected to another type of network (IP address), you will see the following error "Network unusable" and the application will be stopped until you connect to the appropriate network.

- 14. How much data does app use?

You can expect usage of up to 2GB per day, although take note that based on your network speed, we can reach a maximum of 15GB per day.

- 15. Can I protect myself from using my whole ...orking?

If you're using Android, you will see a small, green notification in the notification bar. On Windows, just hover over the little bee icon in your notification tray.

- 22. Will Honeygain work if I use a VPN?

No, we do not support VPN or Datacenter network IPs.

- 23. What happens if I switch off my Wi-Fi, or Wi-Fi is out of reach?

The application will pause automatically and will wait until it's able to reconnect back to the network.

- 24. Will Honeygain's network usage interfere with my everyday data usage?

You shouldn't feel any difference with our app running in the background. We've set our app to never use more than 10% of your available network bandwidth.

- 25. Does the app use more battery?

Yes, while traffic sharing is active the app uses the device battery. Based on the age of your device the expected consumption may vary from 5%-8% of battery per day.
