Thread: [\[OFFICIAL\] OP8 is Recruiting - It's about time...](#)

Lrrr - February 11, 2020, 10:27 pm

Who is OP8? OP8 is made up of a small group of highly trained individuals in various software and security fields.

OP8 strives to produce AAA quality products and services to the HackForums community.

OP8 staff and team members share in all the group profits. (Get paid to be in a group, not the other way around!)

OP8 members will receive professional training, private methods, exclusive offers, and much more.

Not just another group...

The core OP8 team is a skilled group of software developers, security researchers and systems engineers with experience in different aspects of the information technology industry. We strive to share and collaborate but most importantly learn about how things work. Coming from different groups throughout the internet, our core team has been active since 2001. We have a burning desire to understand the systems that we use most often, to try and exploit them. Not only to benefit ourselves, but to benefit those that use them. We aren't a group of hackers for hire. We are not a political movement or cause. We are a group of people who like to push the boundaries and question everything.

Would I fit in?

That's a tough question, take a look below at some of the things we like to talk about. In general if you answer yes to any of the following questions, you'd probably fit.

Do you like to take things apart to see how they work?

Do you feel the need to jailbreak/root/mod everything you get?

Can you count cards/calculate odds/really good at algebra?

Do you enjoy patterns? Can you identify patterns easily?

Are you good at memory or strategy based games?

Do you find superfluous rules to be a waste of time?

Do you commonly solve challenges differently than others?

What is OP8's focus?

Leaks. (Databases, Rawerror logs, RAT metadata, packet logs, private code, and more.)

Exploits. (Public, Semi-Private, Private, and even 0-day)

Security. (OPSEC, INFOSEC, risk mitigation, and vulnerability assessment)

Privacy. (VPNs, Qubes/Kali/Tails, PGP, and other risk mitigation methods)

Informational Software as a Service (SHODAN, Vega, Skipfish, etc)

Group's Userbar

General Requirements Member of HackForums.net for at-least six (6) months.

No Open/Unresolved Contract Disputes (Exceptions for those who post proof of no wrong-doing on the dispute thread)

Minimum of 250 posts outside The Lounge

SectorsDesign

Development

Security & Research

Requirements for Design SectorA portfolio that consists of your own unique work

Experience working with a team

Experience with frontend CSS/HTML

(Optional+) JS app development experience

Designer Application

Code [color=#9977AA][size=large]Timezone do you Reside in?[/size][/color]

[color=#9977AA][size=large]Are you fluent in English?[/size][/color]

[color=#9977AA][size=large]What is your PGP public key, or keybase ID?[/size][/color]
[color=#9977AA][size=large]Application Token: [/size][/color]We have developed a service to generate applications tokens, but it seems that our application is not working...[if you can fix it](#), it will provide an application token. Please submit the application with your gitlab username to gain access to our repositories. You may edit your application and provide your application token once you have completed the assessment.

Application Token Challenges

For the development and R&D sectors we have created various challenges and assessments that will be used alongside of your application in the decision process. Among these are CTF-inspired challenges and code reviews in the form of merge requests that will test your programming knowledge and your skills as well as your understanding of software development control systems.

For the CTF-style challenges there are no rules. You can use any tools in your arsenal (or write them yourself for brownie points) to find the solution and a summary/write-up of your process will help tremendously to gauge your understanding. Please do not post your papers on this thread, rather PM a leader directly with a reference of your Token.

For the code reviews you should submit comments that would improve the code or fix a bug or even add a useful thought or idea.

Remember that you are applying to a group with the intention of becoming a part of a team. You will be working together with others and with that comes a shared level of responsibility.

scam. - February 11, 2020, 10:52 pm

Lrrr is a good man and is bringing a strong group into the mix.
Breath of fresh air between all the cash grab groups.

Good luck w the group and good luck to all who apply

Deal - February 11, 2020, 11:12 pm

We had our differences regarding the rate my userbar.
That aside I like this concept. And I like the fact that you as the only recent group, does not print "BUY IN" all over the place. But rather expect an application like the old groups used to do.

Good luck with the group.

Human - February 11, 2020, 11:19 pm

Applications limited to those 3 sectors?

Lrrr - February 11, 2020, 11:24 pm

Thank you both!

(Feb 12, 2020 12:19 AM)Human Wrote: [CITE](#) Applications limited to those 3 sectors?
As of right now, yes. In the coming month or two we will hold a more general recruitment for members who may not be as skilled in the specific fields but have a desire to learn.

eXceptional - February 11, 2020, 11:42 pm

Timezone do you Reside in?
- India Standard Time

Are you fluent in English?
- Yes

What sector are you most educated in?
- Designing according to the thread but I am good with Social Media.

How much time can you realistically devote towards group activities per week?
- I am on Hack Forums almost all day and I will be available if needed by any fellow member.

Links to HF design threads or verifiable dribbble/deviantart/etc:

Shisho - February 12, 2020, 12:18 am

I am really excited to see some members who apply and get past that pesky application token generator (always causing problems, you know, I think it wanted two salmon for dinner) try these CTF challenges. I've been hard at work :)

Good luck to everyone who applies!

SIM-2327840 - February 12, 2020, 2:52 am

This looks great. Good luck OP with your group?

Maxorg - February 12, 2020, 6:01 am

Timezone do you Reside in? GMT -4
Are you fluent in English? Yes, it's my first language.
What sector are you most educated in? Design
How much time can you realistically devote towards group activities per week? I am online all day, but I can devote 5 - 8 hours per day to the group.
Links to HF design threads or verifiable dribbble/deviantart/etc: www.maxorgdesigns.com

spiral - February 12, 2020, 7:40 am

Seems like a great group, hope it works out :)

SIM-3323508 - February 12, 2020, 8:39 am

This is dope Lrrr, I am looking forward to seeing what your group puts out. Best of luck bro!

Segregation - February 12, 2020, 8:40 am

Good luck to all those that apply! p.s i love the userbar

SIM-1729678 - February 12, 2020, 8:44 am

Best of luck with this mate! ??

Pawnhub - February 12, 2020, 9:11 am

Finally we have a nice developer group to look forward too! I've been waiting for this moment. Honestly this has been long overdue and I can't wait to see this group expand.

Lrrr - February 12, 2020, 9:29 am

Good luck to everyone who applies!

It's almost like this code is getting pushed to master without a peer review ??

If only someone could fix it or reverse it and write their own...

Herbert - February 12, 2020, 11:02 am

Timezone do you Reside in?

GMT+1

Are you fluent in English?

Yes, I've adapted to the English language since 2004, would say I'm fluent now.

What sector are you most educated in?

Graphics and Visual Design, IT Hardware and Digital Marketing.

How much time can you realistically devote towards group activities per week?

I'm active between 8-12 hours a day, 2-4 hours if I'm actively working on commissions or if I have something planned with friends/family.

I can devote majority of my time on the group.

My guess is that it's not as important to be able to solve the challenge as what your attitude is and how you are like as a person. If I'm correct, then they just made the challenge easy so that they can tell you know the basics.

Good luck with the group Lrrr and AV ???

MavenGradle - February 12, 2020, 11:17 am

No. DevOps has nothing to do with security/obscurity in the context of this challenge. Running the code and idiots posting their private information should be avoided because not all developers use docker. E.g. cgroups=2 people prefer using podman and also mostly dislike the docker daemon. Besides, even the 'real' content is fucked because it's invalid JSON, by the way, so whatever the point of

this is, is not really a good indicator of coding skills, at all, if you're trying to recruit developers and not DevOps people. See the required skills:

Code Experience with Python 3 or C
Experience with Postgres & Redis
Experience with RESTful API's

(Optional+) Data warehousing and analytics (Spark/Dask/etc)

Tell me, how many of them will be familiar with containers? See how that's flawed logic?

Shisho - February 12, 2020, 11:38 am

Running the code and idiots posting their private information should be avoided because not all developers use docker. E.g. cgroups=2 people prefer using podman and also mostly dislike the docker daemon. I can agree with that but, to be fully transparent, you do not need to use Docker.

Containerization preferences aside, what matters is not the what but the how :)

Lrrr - February 12, 2020, 11:43 am

I didn't really intend for the coding challenges to have much to do with programming skills. I like to work on a micro-service infrastructure and honestly, those kinds of services are so simple to write, it is easy enough to train someone who is not very skilled with python how to write a simple python service with health checks and metrics. The idea behind the challenge is about how you came to the conclusion, how quick you assumed things (for example, posting the false flag) and other things. I was genuinely curious to see how people went about solving it, since it can be solved with nothing more than a few lines of bash...or as complex as what it is (which is an overly complex app)

MavenGradle - February 12, 2020, 11:47 am

(Feb 12, 2020 12:38 PM)Shisho Wrote: [\[CITE\]](#) Containerization preferences aside, what matters is not the what but the how :)

Running this code outside of docker will return the default token, which will request the user information. How, in coding terms, is that a false flag? It's deliberately set to retrieve personal information and asking developers to post their personal information unless they happen to look at the docker file and figure out that they should have been running this in a docker container using a specific environment variable set. Users that wouldn't know any better would be posting their data here.

Please, don't mix DevOps with development (for which this recruitment thread is asking entries, not DevOps). There's a reason DevOps is not called development and DevOps is not called development. DevOps engineers don't even have to write code per sé.

(Feb 12, 2020 12:43 PM)Lrrr Wrote: [\[CITE\]](#) I didn't really intend for the coding challenges to have much to do with programming skills. I like to work on a micro-service infrastructure and honestly, those kinds of services are so simple to write, it is easy enough to train someone who is not very skilled with python how to write a simple python service with health checks and metrics. The idea

behind the challenge is about how you came to the conclusion, how quick you assumed things (for example, posting the false flag) and other things. I was genuinely curious to see how people went about solving it, since it can be solved with nothing more than a few lines of bash...or as complex as what it is (which is an overly complex app)

Coding challenges not having much to do with programming skills? Okay. It would be beneficial to use better wording (e.g. a DevOps & Developer recruitment). See description given above for reasons why, but I'll take my leave with the disclaimer in any case.

Lrrr - February 12, 2020, 11:48 am

(Feb 12, 2020 12:47 PM)MavenGradle Wrote: [\[CITE\]](#) Running this code outside of docker will return the default token, which will request the user information. How, in coding terms, is that a false flag? It's deliberately set to retrieve personal information and asking developers to post their personal information unless they happen to look at the docker file and figure out that they should have been running this in a docker container using a specific environment variable set. Users that wouldn't know any better would be posting their data here.

Would you be less offended if i changed the wtfismyip reference to a blank json object on pastebin?

(Feb 12, 2020 12:47 PM)MavenGradle Wrote: [\[CITE\]](#) Coding challenges not having much to do with programming skills? Okay? It would be beneficial to post a DevOps recruitment, e.g. see description given above, but I'll take my leave with the disclaimer in any case.

Devops sector is actually a solid idea.....

OverLoad - February 12, 2020, 11:53 am

post to come back when i fit the requirements

nice group i can see

Lrrr - February 12, 2020, 11:56 am

I have pushed changes to remove any reference to `wtfismyip.com/json` and replaced it with a blank json object instead. This will hopefully help new members from potentially posting deanonymizing information.

Shisho - February 12, 2020, 11:57 am

Did you try... not using the default token and instead... replacing it? You're tasked to get the application token not fix or submit working code.

The challenge is not that difficult! You're focusing too much on Docker! If I were to rewrite the Docker configuration for use with Podman would it change the fact that the false flag is false? I'm sure someone would still complain about there not being a Docker configuration!

Forgot about Docker and use what you got halfway to solve the rest of the challenge, if you're still interested.

Lrrr - February 12, 2020, 11:59 am

Keep me updated. I definitely want to pay attention to what you're up to.

Shisho - February 15, 2020, 2:22 pm

I'm looking forward to seeing some applications from users who want to help create something amazing!

Lrrr - February 16, 2020, 2:09 am

I will be closing the recruitment on or around the end of February, and was really hoping for a few more applications.

If you feel that the application is too much work...don't bother. However, if you have an interest in solving puzzles we urge you to give the application a go you might surprise yourself or you'll think it was so easy that you need to apply and tell us what's up.

If you feel that the application process is just way outside your comfort zone, we will be holding a General Recruitment and Learning Sector recruitment designed specifically for those that want to learn.

In the coming month or two OP8 will be releasing some great content for HackForums as-well as unique and useful services for it's users. Get in on the ground floor of a group that will help you craft a multitude of skills while helping others.

It's sad what has happened to groups over the last few years, the group scene is burned. Groups get bought, buy-ins and other schemes, group gets sold. Rinse and repeat without much fail. The groups that oppose that statement are usually not much more than a shell of a former groups, (Don't hate, you know at some level it's true.) OR the group is totally inactive. Crews can change UB's and all the HF gamification driven to Crews, I understand why the price for groups has dropped significantly.

Instead of bitching about it and allowing the process to continue, I plan to change that or rage quit trying.

Bastille - February 16, 2020, 2:15 am

Nice thread OP, and nice group too ! I'll keep it in my mind and come back when I'll be more skilled ;)

Just bought several books regarding Wireshark, want to master this tool in less than 1 year. I'll let you know if the recruitment is still opened ?

SUI-3183372 - February 16, 2020, 10:05 am

Would OP8 ever consider starting a CTF team to compete for rankings on CTFTIME? I used to run my University's CTF team (graduated last year so no longer officially affiliated, but climbed to the top 50) and have been looking to start or join a new team.

Lrrr - February 16, 2020, 11:16 am

I'm going to be real with you...that sounds fun and something I would be interested in talking about. But in reality something like what your talking about would need a dedicated team of atleast 2 or 3 members. The concept sounds fun, but the execution would take a lot of dedicated work...I just dont see us getting to a proper CTF team on our current roadmap without some serious help. If that's something that interests you and you think you may be interested in putting together and leading an initiative like what your discussing let's talk. Something like CTF tied up with HF crews could be a neat idea if crews don't totally revolve around the hack game.

If that's something that interests you and you think you may be interested in putting together and leading an initiative like what your discussing let's talk. My other concern would be the CTF participants and prizes for leaderboard leaders....though something like CTF tied up with HF crews could be a neat idea if crews don't totally revolve around the hack game.

I don't mean setting up your own CTF's, as you're right, that's both time consuming and rather difficult. I just mean forming a team within OP8 that competes in the public/online CTF's that get posted to <https://ctftime.org>

Generally there's 1-2 CTF events per weekend, sometimes more, sometimes less. They range from challenging CTF's that are based around qualifying for more advanced in-person events, to beginner CTF's meant to introduce you to CTF's in general. Usually these events include anywhere from 10-30 challenges ranging from crypto, web exploitation, binary exploitation, reverse engineering, forensics, networking, and so on.

It's really enjoyable getting a group of 5-10 people together and hammering out these challenges, helping each other out as you go, seeing how high you can climb on the leaderboard.

Lrrr - February 16, 2020, 11:27 am

How's the recruitment process going so far?

Lrrr - February 19, 2020, 11:10 am

(Feb 19, 2020 12:00 PM)MavenGradle Wrote: [\[CITE\]](#) How's the recruitment process going so far?

A bit underwhelming, We had thought about what you said (CTF's being too easy) but with the lack of interest from the general HF public it doesn't seem like anyone is really interested in the challenges.

That doesn't negate the fact that with the small team we currently have, we are working on some really cool ideas (I assume it will just take longer since I was expecting a bit more help)

Maybe once we release a few initiatives in March people will be more interested in OP8, I get it, we are a new group and not many people know the name, so I totally get the lack of response...I think it will be a different case entirely once a few of these ideas we have come to fruition.

There's nothing wrong with the challenges. They're easy if your understanding of programming and general computer knowledge are up to par. Perhaps a little bump here and there will help you attract the right kind of attention, but you have to keep in mind that there's currently very little activity in the development sections, hence the low influx of programmers (at least that's my personal look on things).

I'm sure that with the right marketing and group activities that you'll see general interest in joining rise. Disregard what Zeus did though, that completely crossed the line. Contributions to the programming sections would be greatly appreciated, by the way, so if you guys are planning on making any tutorials or best practices, that would be interesting to see!

I couldn't agree more, OP8 Learning Sector is working as we speak for an initiative that is similar to what you're thinking. Thank's for the kind words and advice.

Zinx™ - February 20, 2020, 11:17 am

Nice thread man ill pm you would love to join

Lrrr - February 20, 2020, 1:25 pm

Official recruitment will be closing Saturday February 29th. If you wanted a chance to join a group that's going to make schit happen, this is you're last week to do so.

Tyr - February 20, 2020, 2:07 pm

Nice to see a group here in which doesn't require a buy-in and accepts based off of one's skill and application content.

Dorrance - February 20, 2020, 7:42 pm

Timezone do you Reside in?

Pacific (GMT-7)

Are you fluent in English?

Affirmative

What sector are you most educated in?

Marketing & Consulting

How much time can you realistically devote towards group activities per week?

On an average of 5-10hrs on a minimum.

Message me for my full resume

scam. - February 20, 2020, 7:55 pm

hey there i'd like to buy in

Tyr - February 21, 2020, 2:57 am

Timezone do you Reside in? I currently reside in the GMT -5 time zone. Eastern Standard Time.

Are you fluent in English? I am extremely fluent in English and bilingual to a certain extent.

What sector are you most educated in? This is a very tough question for me because I like to consider myself to be a very diversified individual. I would have to say that the "Design Sector" is where I am most skilled. I have worked with Photoshop and Dreamweaver since the age of 13 and have quite a lot of experience within web management.

How much time can you realistically devote towards group activities per week? I make my living from my home and live quite comfortably. I also have cut off quite a lot of toxic "friends" from my life and consider myself more of a lone wolf and now simply strive to better myself in every aspect possible. With this being said, I am always on the computer. A rough estimate would be upwards of 30-40 hours a week, depending on the week, of course. This is just an average estimation on my behalf whilst taking into accordance my personal life.

Links to HF design threads or verifiable dribbble/deviantart/etc:

<https://www.deviantart.com/1mm0rtal1ty>

I would link a forum and discord with unique logos in which I own that has much of my work on it, but I would be breaking site policy by doing so.

(Most designs are related to my old gaming project's website theme. I also marketed the entire theme itself on a separate board years back in exchange for currency. It is almost 6am and I need to get some sleep. I will upload many more if need be from a flash drive tomorrow that contains more

of my personal work if need be). This is a freshly created DeviantArt, as it would seem my old one was hacked.

Thanks for looking over my application and artwork associated with it. I know it's not much, but it's better than nothing for the time being. I am also extremely tired and must stop for the day. Hopefully I can find that flash drive.

Mr Kewl - February 21, 2020, 7:58 am

The group looks great, good luck to everyone applying. :)

Shisho - February 21, 2020, 10:09 pm

This is not just another group looking to take your money. That's why we don't charge you any to join! This is an exclusive team of ambitious and talented users looking to work together to create amazing things.

We are currently looking for an experienced C# developer that can work alongside our development team on some very interesting and very profitable projects.

We promise that you will not be let down so please apply immediately!

Herbert - February 21, 2020, 11:42 pm

The 'Learning Sector' should be done right before recruitment closes, hoping that some talented educators apply by that time.

Goku - February 22, 2020, 3:20 pm

Timezone do you Reside in?
GMT+1

Are you fluent in English?

I would guess so, I should work on my articulation tho.

What sector are you most educated in?

webdev/design. I learned a lot by myself but currently am in my last year studying Media Designer

in Netherlands.

How much time can you realistically devote towards group activities per week?

1 time, no wait 2 times.

I honestly don't know. Sometimes I'm very active, some times I check HF once a week. Depends on real life situation.

Links to HF design threads or verifiable dribbble/deviantart/etc:

<https://flexxkii.carbonmade.com/>

<https://www.deviantart.com/leipearmeen>

PM me for my personal portfolio, don't want to get doxed easily.

Pink Floyd - February 22, 2020, 4:38 pm

Timezone do you Reside in?

-- GMT (UK time)

Are you fluent in English?

-- Positive.

What sector are you most educated in?

--Did diploma in Web Engineering but I specialize in Graphics Design.

How much time can you realistically devote towards group activities per week?

--As much time as I am active on community, first thing I browse both on my PC/Smartphone is HF so depending on what's going on in life.

Love the art, do you have any experience with UI/UX or designing simple admin panels?

Pink Floyd - February 23, 2020, 10:04 am

(Feb 20, 2020 08:42 PM)Dorrance Wrote: [\[CITE\]](#) Timezone do you Reside in?

Pacific (GMT-7)

Are you fluent in English?

Affirmative

What sector are you most educated in?

Marketing & Consulting

How much time can you realistically devote towards group activities per week?

On an average of 5-10hrs on a minimum.

Message me for my full resumeWelcome to OP8

Pics of feet and ur in.

(Feb 21, 2020 03:57 AM)Fad3d Wrote: [\[CITE\]](#) Timezone do you Reside in? I currently reside in the
GMT -5 time zone. Eastern Standard Time.

Are you fluent in English? I am extremely fluent in English and bilingual to a certain extent.

What sector are you most educated in? This is a very tough question for me because I like to
consider myself to be a very diversified individual. I would have to say that the "Design Sector" is
where I am most skilled. I have worked with Photoshop and Dreamweaver since the age of 13 and
have quite a lot of experience within web management.

How much time can you realistically devote towards group activities per week? I make my living
from my home and live quite comfortably. I also have cut off quite a lot of toxic "friends" from my life
and consider myself more of a lone wolf and now simply strive to better myself in every aspect
possible. With this being said, I am always on the computer. A rough estimate would be upwards of
30-40 hours a week, depending on the week, of course. This is just an average estimation on my
behalf whilst taking into accordance my personal life.

<https://www.deviantart.com/1mm0rtal1ty>

I would link a forum and discord with unique logos in which I own that has much of my work on it,
but I would be breaking site policy by doing so.

(Most designs are related to my old gaming project's website theme. I also marketed the entire
theme itself on a separate board years back in exchange for currency. It is almost 6am and I need to
get some sleep. I will upload many more if need be from a flash drive tomorrow that contains more
of my personal work if need be). This is a freshly created DeviantArt, as it would seem my old one
was hacked.

Thanks for looking over my application and artwork associated with it. I know it's not much, but it's
better than nothing for the time being. I am also extremely tired and must stop for the day. Hopefully
I can find that flash drive.Great work, welcome to OP8

I dig your interest in big data :) I'm sure there's a bright future here!

We're looking for the most proactive members with the proper attitudes for success. Don't let this opportunity pass you by!

Lrrr - February 25, 2020, 5:10 pm

This recruitment will close Friday. Thanks all who showed interest. We will be holding more general recruitments later this year.

I'd say the group is still by far the best on HF for now but you should not expect everyone to keep the OP8 UB. Even if you do keep a criteria of forcing everyone to keep the UB how long do you expect people to stay in the group when there are multiple groups here with different color options and nice & good looking UBs. I'd want to join in anytime if you ever plan to remove the criteria that's being forced. Help apart from being in the group will always be done. Count me in.

Thank you for the kind words, but I fear you didn't read the Handbook. The UB must be worn through the "initiative" phase similar to how other groups function. You did not complete your initiative, and therefore you were required to wear the UB.

In any case, no hard feelings you are a nice guy and I wish you the best with your new marriage. Get working on those kids!

Thank you for the generous words and I'll obviously be working on the kids within 2-5 years from now.

What kind of hardware people? Like badge hackers, chip hackers, flash dumpers, and jtaggers? Hell yes!

Stanley - February 28, 2020, 4:56 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

VIXV - February 28, 2020, 5:42 pm

Timezone do you Reside in? GMT +0

Are you fluent in English? Yes.

What sector are you most educated in? Development.

How much time can you realistically devote towards group activities per week? Around 25 +- 5

Do you have a github/gitlab or contribute to any OS projects? No I've worked alone on everything coding wise so far.
