ON HOLD - While I finish current projects.

[Start a contract!](#)

- Don't waste my time if you're not serious.
- The down payment (or deposit) is non-refundable.
- Whenever I state in the contract that the down payment is refundable if not delivered, it means that if I fail to create the product, I will refund. If you change your mind a couple days after ordering a service, I won't refund. This is because you've already wasted my time and I started building the product. I also have a team of UI/UX designers so keep that in your mind.

If I can provide somewhat clear of what I want, will you do the research to be able to create what I want? I mean doing research to make it work, but before anything, cost calculation for servers and third party providers that may be needed?

Also, what does the pricing looks like?

Pennywise,

Game - March 27, 2020, 9:21 pm

I'm considering using your service although I'm not quite ready yet. I'm just dropping a post as a reminder and I'll be setting an actual reminder too.

How much would a simple iOS/Android app that would run scripts from a backend server cost?

It won't be this but for example a website with host>ip resolver in app format.

Thank you.

It depends on the app. But if it's simple, it shouldn't cost too much. Let's discuss this when you're ready.

Stanley - April 17, 2020, 6:14 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley

Can you develop software that will work on Windows & Mac?

Trappy - May 13, 2020, 12:46 pm

King does his best I think but sadly that's just not enough. He coded me a bot and it has multiple issues that he doesn't get around to fixing, as well as very poor communication. He is a good guy but I don't recommend using his services, he does decent work but very unreliable.
