Web Hosting. We are gaining over 10 new customers a day. We will implement our VPS services shortly. Would you like to see Bulletproof VPS's or regular ?

Most interested in a bulletproof low-spec VPS. Multiple, if they're suitable for scanning.

Once we are settled in we will be offering VPS packages and performance boosted dedicated servers. Appreciate the feedback. We are gaining approximately 10 clients a day!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Sorry you did not enjoy your services with us as many customers are very satisfied. It looks like you never followed hackforums policy on making a contract before purchase nor do I know who you are so we can assist you.

Edit;

You asked for a ram upgrade and never provided that payment.

You were unhappy once you found out spoofing was not enabled which you NEVER asked for. You have attacked our servers via "DDOS" Due to our websites terms of service you will NO LONGER be receiving your refund. Find a new host provider. Working on blocking the attack now and your information has been noted. ? All customers websites are still online. :)

You as a seller have failed to enforce the use of contracts. If it happens again, RIP your HF account.

I need Vps, do you have vps plan promo ?

The One And Only - February 25, 2020, 1:25 am

We are experiencing another attack! No worries we are online still.

Choch2 - February 27, 2020, 10:27 am

Hey man , what about kvm / vserver hosting

let me know if its possible or your partners maybe do this.

best regards,

How easy do you think it would be to run through bandwidth? I am typically spoiled with unlimited bandwidth, asking regarding lower priced shared hosting for a buddy of mine.

Depends on the type of website you have, and how much traffic you get.
