In this business u need to invest money to make money so my solution is have 3 rooted androids with 3 different snaps then add 50 ppl max on each snap every hour once u get 2 time outs delete snap get a new account also spoof your device id and mac adress via xposed and device id changer also install magic disk to prevent snap chat noticing :) bingo they cant stop us all :)

Or you can find a more passive but highly effective way to gain traffic, i get 50 people a day on my two set and forget methods. I have so many relevant h*rny/lonely people i only enable my traffic methods for 1 day max per week/fortnight
