Thread: [vps that allows ddos scripts](#)

**jkl110able** - February 13, 2020, 12:08 pm

I'm looking to buy a vps or any good stresser you can recommend that allows for ddos of home connection.

price range is 30-50usd

**ZwProducts** - February 13, 2020, 12:24 pm

Your best option would be checking the marketplace for something like this.

**jkl110able** - February 13, 2020, 12:31 pm

bet and i've been searching around for awhile

would you or anyone recommend this <https://black.host/unmetered-vps-hosting>

Code " Any content that, in our judgment, is unethical, obscene, threatening, harmful or illegal violates our Terms of Service or this AUP, this includes but not limited to the following type of content

Botnet controllers / clients

Bruteforce Programs / Scripts / Applications

Hacker focused sites / archives / programs

IP Scanners

DDoS tools

Sltes promoting illegal activities

Proxy Scripts / Anonymized

Fraudulent / Phishing Sites

Push button mail scripts

Mail Bombers / Spam Scripts

Spoofing / Impersonation"

Probably wouldn't use this one, it's not really that hard to find a bulletproof server, would just check the marketplace

Pm me or qyservers.xyz

**Tyr** - February 17, 2020, 4:31 am

Man, open your eyes bud, there's offshore VPS hosting all over these forums in the Marketplace.

Also be careful about how you phrase your posts and do not self incriminate.

GL!

**piet** - March 28, 2020, 6:10 am

Hello,

iam selling offshore spoofed vps and dedicated servers for more info please check my thread

**SpackHost** - March 28, 2020, 8:48 am

Hi sir.

Use spoofed server for ddos attack so no one can trace your server ip.

We allow spoofed ddos attack on our hosting: <https://spackhost.com/>

This is our vouch and proof page: <https://spackhost.com/vouchproof>

We also give support for ddos if you can't down your target.

We also offer free private ddos script.

Go on our discord for vouch from real customers: discord . gg/X9K3977

qyservers.xyz are scammers and resell from justhost.ru (shit hosting for ddos)

black.host don't allow ddos attack.

Be aware from scammers.

Kind regards

**rSM-** - March 28, 2020, 8:50 am

**Pythonexploits** - March 30, 2020, 12:38 pm

what do u mean by "ddos script" if you talking about a DOS script then I would use OVH.com they have strong servers they will ban if u make the packet size to high but if u keep it around 1024-1460 you should be good you could also use digital ocean they will ban you servers but i think because of this COVID-19 BS you would have a problem bc most of the people are not working

**lambiggsthacker13337** - March 30, 2020, 12:42 pm

ZBM364x discord invite code to bulletproof cheapest prices servers
