Dude, I only bet 1 Byte and won 250 Bytes. 1 random spin :)

Dude, I only bet 1 Byte and won 250 Bytes. 1 random spin :)I just achieved the Dicey award today. It is randomized with a lot of betting, not the jackpot. I heard some people say there is a 10k spin average. I got mine probably around the 3,000+ mark

I have been told in this thread it's random and you need to at least spin 10,000 times I guess...

My Bytes are all on the World All Stars @ USA All Stars Basketball game. USA is an easy win, if they lost at home it would be politically incorrect from what I understand. 100% sure shot IMHO

Ok, but I just want to enjoy this game:

Just use this imacros script on loop:

```
URL GOTO=https://hackforums.net/slots.php  
TAG POS=1 TYPE=DIV ATTR=ID:spinButton  
WAIT SECONDS=30
```

Average around \$5 depending on how much a buyer needs/wants them.

1 Byte and spin 10,000 times is what everyone is saying.
