Yes, there is a purchasable scratch card for 1k bytes.....but if you're paying with 1k bytes then that isn't paying with crypto... This is for spending REAL money (and Omni only accepts crypto)

I will for sure mate. Thanks and let's not change the topic. Are you actually considering the Scratch Card buy?

I would have bought it but getting married so spending now on cards isn't an option for me.

If there was an award like last time where you get x award if you spend y amt or more then I would but I don't think its worth the risk. I got super lucky last time and that doesn't happen often for me. Maybe in the future though. Like next time there is a BOGO

HF will not get involved. Source; <https://hackforums.net/misc.php?action=help&hid=44>

Complaining about being ignored by Staff that got plenty of things to do, I assume, isn't helping
anybody. Btw, are you Monopoly from the past? Not good at recognising which SIM username is

\$10 in. Why not. Anyway UPDATE us! good luck !

In my experience, you should go farther and just do 100\$. Its honestly been the hardest of all the cards to make a substantial amount of bytes off those \$10 btc cards.

The reason why I can win on the bytes cards and not those 10\$, the difference is refund points. Which is not available when using the 10\$ btc cards obviously.

I took your advice and got fked in the ass :'(

I only got 15k from TWO \$100 scratchcards. 1 \$10 scratchcard I didn't win anything and 1 \$10 scratchcard I only got 1k bytes.

16,000 Bytes for \$110. I am depressed af now.

I just got 2 25k before and now 2 50k card wins off bytes. Maybe im just lucky idk.

the refunds provide more chances to try again from 1k byte wins. So many more chances.

the btc ? not even close many chances unlike byte.

anyway sorry and good luck next time.
