Thread: [2020 HQ phone/sms verification](#)

The only one i know is felixmerchant and it costs 7usd per sms, 0.8 btc transaction fee included it worked for me with yahoo and google many times

All free sms verification services have blacklisted phones in 2020, even the paid one's i know of.. it seems there is no up to thread service for this in HF
I was wondering if anyone knew a cheaper way than this, 7 is too much, especially when you can't make money because tough luck with carding..

<http://smspva.com> Should work completely fine, they sell Yahoo verifications at 0.005\$ each. Let me know if it works for you, I have a free option for you as well, but I'm not sure if it will work for Yahoo.
