Thread: [ATILLA MOST USELESS CRYPTER](#)

morrigan - February 17, 2020, 1:15 am

NO ONE SHOULD BUY THAT CRAP.

Crypter doesn't work. You will always be getting Error on crypt. Really wasted money on that nonsense

WD and AVAST runtime crap

No USG. Few mins detected

Do not waste your money.

yogi43 - February 17, 2020, 3:51 pm

never heard of it buy known chit dude

Atilla - February 17, 2020, 4:36 pm

I'm not going to answer you because you're probably an idiot.

If any of my clients come by, they'll be happy to answer this shitty post.

Hey Morrigan pls may i know why you said so?

cos its good we back it up with proof so that the rest of us will see it and talk with Atilla

menaxe - February 17, 2020, 11:58 pm

atilla remains the best, what i admire most is his support, he is a nice guy i must confess!!

mountEverest - February 18, 2020, 2:14 am

Hey Morgan, without being bias, you are just a cheap hater, Atila is better than all your generation crypters, if you are a kid, move to the kids table and an never post trash here, Atila remains a great deal.

A55 LICKER!

He obviously begged you to come say nice thing about his shiit crypter and you foolishly came.

Keep licking his a55.

Go to his discord and see for yourself how ppl complain and how he quickly deletes all

Very unstable with too many errors, i still have the license (i bought 3 months, remains less than a month to expire), wasted money to purchase the shiit.

Many ppl complaining on his discord, all he does is to delete all complaints and ban users so new customers won't get to see it, instead of fixing his shiit since more than 2 months now.

You can see he's a dumb a55 mofo.

He created a new HF acct to vouch for his shiit.

I'm not going to ask for refund, he's a hungry ripper. Let him eat

roselopez - February 18, 2020, 10:36 am

Atilla is trying, delivers update around 6AM everyday, mostly Asian and Europe time... he had to do a few touches recently, but aside that, its fine. Works on most software and have some pretty nice features. Doesn't ban even for spamming stub generated from his software.

Yes he refreshes the main discord chat to keep it clean...people can come advertise and post spam or try to scam other, so he usually cleans up to keep it afresh for the important fresh news everyday.

If Atilla Crypter exist, it's only because i give him my RunPe for free. It's a bad coder, i tell him to change a lot of thing but he never listen. I accessed his server many times, and i could infect every customers. His crypter is not secure at all. I'm verry bad at this, if a smart guy want to infect all of his customers, it can.

A bad coder? You are diot.
Your Runpe is Clay Davis.
i have coded my runpe idiot.

I remember your crypter after a week you have stop and scam all customers.

you have hacked my server ? Wow i want look now :)

Anyway, keep talking Clay Davis, I love it :)

Bye :)Best joke i heard today you dont know how to write a single line in C ?

if by servers you mean 961api servers, you might want to contact the owner of licensing system as it means all 961api customers are vulnerable

if you can find such vulnerability in codevest ill give you a bounty

His crypter was sending the file to its server which encrypt it. But his crypter can send php file to. So I was able to upload a shell. Lol.

It simple, if the contract wasn't made here on hf, you probably don't have anything to proof here.

You guys could be banned or do you want me to push for your ban?

you can't review product you didn't have a contract with, which means you didn't buy it.

If you did buy it without a contract, why come here and rant?

you are probably gang repping which is not allowed here.

Thanks

are you retarded? he didn't made it clear where he found it and even suggested to contact you if the problem was from the licensing system, i was just trying to help

Does your dumb head tells you that i'm competing with you? my stuff is FREE of use and i haven't put the slightest effort to advertise it since website design is not finished and i have other priorities while you have like 20 threads about it so i couldn't care less about your licensing system which by the way, the crackers i worked with confirmed you have weaker security long time ago ;)

you seem very frustrated that i offer something similar for free and afraid that i'll steal your bread if i start getting serious about it and start advertising

my licensing system is privacy friendly unlike yours. I feel bad for your userbase if you go down like aeonhack, i bet you can't even buy hosting/domains anonymously, i mean besides the fact you store a lot of sensitive info, you don't even allow vpns or tor ips, what a joke...
