Thanks..

Youve already used my free keylogger, this is the same but with more features added and premium support from both me and my partner. you will surely love this as you can create your keylogger even by using your smartphone.

- it is coded in csharp, the based keylogger was currently available for free with limited features
- it only support chrome and firefox at the moment, it doesnt have support for mail client but i do currently work for outlook and thunderbird, ill pushed this maybe in two weeks after my test is finish.

Hello, what browsers and email clients does it recover passwords from?

Also, is this native or .net?

You may test it by using sseur keylogger, vouch can only be given to upgraded user.

Astonished - February 23, 2020, 1:59 pm

If I am able to receive a vouch copy I'd love one and will leave a nice review.

If not I'm still interested in this and will have it bookmarked so I can purchase in the future!
Looks great
